**Frosh sports**

**Soccer team swamps Medford, 5-1**

**By John Kopelow**

The MIT freshman soccer team soundly defeated Medford High School in its first game of the season by the score of 5-1. Jimmy Clark and halfback Jack Russell were standouts on defense. They outhustled the reserves with the reserves seeing a lot of action. They outscored the team on the first period and coasted in the rest of the way with the reserves. The game both offensively and defensively. Julia Gutman and George Busby scored two goals apiece for the victors, and Harman Clow got the fifth. Fullback Jimmy Clark and halfback Jack Russell were standouts on defense. In their second game the frosh lost to a very well-balanced Connecticut University team Saturday. The contest was hard-fought, and the difference between the two teams was mainly in Connecticut's superior depth. The game could have been even closer if MIT had cashed in on some of the excellent scoring opportunities they had.

**Cross-country**

After finishing second to RPI a week and a half ago, the freshman cross-country team again had to settle for the runner-up spot in its second meet of the season last Saturday. A strong Springfield College squad was the victor with 21 points. MIT had 62, while Williams College had 46. One very bright spot for the frosh was Don Hogan, who finished first with an excellent time of 13 min. 26.4 sec. This being the first race on MIT's new course Hogan presently holds the freshman course record. Others running well for Tech were Sherman Hannah and Pete Perkus, both with times of just under fourteen minutes. The team will be looking for its first victory this Saturday at the University of New Hampshire.

**Sailing**

The frosh sailing squad participated in the Hexagonal last Saturday and came out on top by six points. MIT totaled 66 points. Harvard was second with 60, and Wesleyan took third with 54. Other schools in the meet were Yale, Brown and Boston College. Racing well for Tech were George Fiske, Peter Burley and Mark Johnson. The team will compete next in the Octagonal at the University of Rhode Island on October 25.

"What can my job be at IBM?"

In IBM Data Processing, your job can be full of variety.
- Especially when you consider all the ways computers are used.
- As an IBM Data Processing Systems Engineer, you would be helping customers get the most from their computers. They could be customers in science, government, education, defense, industry, or business. You might even specialize in one field.
- Or, as an IBM Data Processing Representative, you would present to customer executives your ideas for doing their work better with computers. Your own imagination and initiative are the limits of what you can accomplish in marketing IBM products.
- If you are working toward a degree—in Liberal Arts, Engineering, the Sciences, or Business Administration—find out what IBM can offer you in the way of achievement. Thorough training at special IBM schools will prepare you for work in either Systems Engineering or Marketing.
- See your college placement officer for literature on these careers—and make an appointment with our interviewers. IBM is an Equal Opportunity Employer.

Interviews — **NOV. 17-18**

If you cannot attend the interviews, write or visit the nearest IBM sales office.
