Mixer season coming to a close soon

Not all wintering looks bleak. This Friday the Charlestown Singles mixer and those still unregistered may be able to get the Needham mixer in today. If they file it over themselves, but pan,y they now or don't bother. Even a stronger needs presents.

There is something of an unexpected nature being presented Fri-documented. The Aquilo Club, also called the Junior League of the Swedish Charitable Society of Greater Bos-ton, is running it. There is Scand-ian raised on magazine small price 25c. The party will be at Bixlouge Hall in Nor-wood.

That is apparently all that happened this week, just watch the bulletin boards. Last week, for example, the Pembroke Ri-ters called me Tuesday night to tell me about their mixer. Since in-formation has to be here Monday, the only way for readers to find out was through posters.

Next week, in 81F’s week, ap-parently, November 6 is the date for this Marlboro Home mixer mentioned last week. Since there are only 16 girls admission will be limited to ticket-holders, and maybe person who reads this will get 15 will be admitted if there’s room at the corner in the evening. Call Louise White, at 201444 for tickets or further information.

Brook Hall will be giving a mixer either Nov. 6 or 7. The date will be determined by their color theme coming, and if you can find out the date and o-ther information by calling Student Information, CO 2-4300. Please don’t call Brook House, since they can’t handle the information dis-perse-emaining.

West Campus also had tentative plans for a mixer, but plans are up in the air right now, since their social chair has resigned. Things should be clearer in a week or so, and information will be available them by calling West Campus and asking for the social chairman.

**Work with a group worth standing out in.**

The more competent your coworkers are, the greater your satisfaction when they achieve something you’ve done. Competitively, your efforts to be-born so you can move on to additional responsibilities and rewards. Boeing’s world leadership in the jet transport field is an indication of the caliber of the work at Boeing. The forward-stretching re-sponsibility for this leadership has, since 1916, provided a steady succession of pioneering achievements: first twin-engine, retractable-gear, low-wing, all-metal airplane; first four-engine, pressurized airplane; first modern, high-supercharged engines. In 1916, at the age of nineteen, as a matter of course, America’s first jetliner, the 707, and the 720 and three-jet 727. Right now we’re designing a variable-sweep wing supersonic transport.

Boeing is one of the nation’s major manufacturers of heavy transport hydro-planes, and for more than two decades has pioneered most of the world’s applications of the small gas turbine in aircraft, industrial, marine and vehicular fields.

And the space age? Boeing’s contributions here include major contract responsibility for the Minuteman ICBM and NASA’s Surveyor III— launch vehicle designed to send America’s first lunar landing team to the moon. We’re also working full scale in all the phases of space flight, including a manned earth-orbiting laboratory and a lunar orbiter.

Projects underway in Boeing’s extensive Scientific Research Laboratories encompass basic and applied research in celestial mechanics, solid state physics, nuclear and plasma physics, terrestrial and space flight sciences, and control engineering. Scientists and engineers at Boeing work in small groups, under supervisors who are the leading experts in their areas. Individual initiative and ability get plenty of exposure that way. The firm encourages graduate studies at leading universities near Boeing installations. Boeing is an equal opportunity employer.

Show discusses Wiener

By John Blanlinship

The story of the late Norbert Wiener was featured by Channel 2 on "Pathfinders" Monday, October 19 at 7:30 pm and repeated Saturday, October 24 at 8:30 pm. Founder of the science of cybernetics that has produced high-speed computers, he spent most of his life in Boston as a professor at MIT.

Host Benjamin DeMott came to Boston to speak with the man who knew Wiener best. Walter Rosen-Blith, Professor of Communications, and Peter Elias, head of the Electrical Engineering De-partment explained the nature of his work. Dr. James E. Killian, Jr., Chairman of the MIT Corpora-tion, spoke of Wiener as a peo-ple.

As clarified by Walter Rosen-Blith and Peter Elias, cybernetics in the comparative study of com-pplex calculating machines and the human nervous system. The men added that Wiener’s work be-came a meaningful philosophy to him. Where he could not clearly separate man from machine, Wiener saw danger and appealed to man himself to use the machine.

Weiner saw danger and appealed to man himself to use the machine. Where he could not clearly separate man from machine, Wiener saw danger and appealed to man himself to use the machine.

**Major companies to interview here during November**

The following companies will be interviewing on campus during November:

- *Bell Telephone Laboratories, Inc.*
- *Boeing* 1480
- *American Cyanamid Company*
- *Boostrap Corporation*
- *Corning Glass Works, Inc.*
- *Cornell Aeronautical Laboratory*
- *Emerson Electric Company*
- *Ford Motor Company*
- *General Electric Company* 1316
- *General Motors Corporation, Transocean Division* 1491
- *Georgia-Pacific Corporation* 1373
- *Gulf Oil Corporation* 1456
- *H. R. Link Company* 1468
- *IBM* 1454
- *Lockheed Aircraft Corporation* 1486
- *Morse Telegraph Company* 1454
- *Morse Teletype Corporation* 1454
- *Mudickite Corporation* 1456
- *Perkin-Elmer Corporation* 1456
- *Perkin-Elmer Corporation* 1456
- *Philco Corporation* 1456
- *Pittsburgh Electric Company* 1468
- *Polyblend Incorporated* 1456
- *Raytheon Company* 1456
- *RCA Victor Company, Inc.* 1468
- *Rockwell International* 1486
- *Sameson Electric Company* 1456
- *Sandia Corporation* 1468
- *Scientific Applications Institute* 1456
- *Smithsonian Institution* 1456
- *Sperry Rand Corporation* 1468
- *Tektronix, Inc.* 1456
- *The Texas Instruments, Inc.* 1456
- *United Aircraft Corporation* 1456
- *United States Air Force* 1456
- *United States Navy* 1456
- *Westinghouse Electric Corporation* 1456
- *Western Electric Company* 1456
