You are high over the Potomac River just 12 miles from the White House... and viewing 186 acres of extraordinary research activity

Of course, from this height you can't see much detail, which makes the imposing expanse of the two main buildings all the more intriguing. Perhaps you can guess their functions, but it's also what you can't see (and this is summarized in the adjoining column) that makes the David Taylor Model Basin a completely unique fundamental and applied research organization—and a place you should seriously consider for your career as a professional scientist or engineer. As the Navy's advanced facility for research into submarine, surface ship, aircraft and missile design concepts, the Model Basin can offer the young graduate certain specific opportunities hard to find anywhere else.

1. Reach the $10,000 to $12,000 level WITHIN 4 YEARS.
2. Take graduate courses for advance degrees with Navy help.
3. Gain diversified RDT & E experience with the best equipment and facilities of their kind.
4. Work on research projects of recognized national importance.
5. Attain recognized professional stature sooner, at which point a number of futures are available.

Watch for the David Taylor Model Basin interviewer when he visits your campus, or contact Mr. S. Di Maria directly for information.
