'66, '67 show 3 pres. candidates, '65 with 2

Class of '65

Cash Peacock

In September, 1961, two fresh men pulled a st Untitled 911.0x1382.0

Class of '66

Bill Samuels

Over the past year I talked to Don Severance and Fred Letham, President and Secretary of the Alumni Association, about many of the problems and responsibilities that their group face. These discussions and others with Harry Stone and Ken Brock in the fund-related office have made me aware of the duties that some of us as alumni must perform.

I am especially interested in Mr. Easley's newly-formed Committee on Student-Alumni Relations and I am more than willing to plan reunions, organize fund drives, and to continue on this year's Commencement Committee.

This year has afforded me many experiences which I hope would help me in doing a good job for the class.

Class of '67

Ken Browning

The senior class president must be a man not only with ideas for a program but also with experience in executing a program. I have served at all levels in a wide range of student activities and have acquired familiarity with handling the problems faced by a class president in his governmental, service, administrative and social endeavors.

Just as important as competence and experience, however, is responsiveness to student opinion. I have in the past and will continue in the future to do my best to speak and act in accordance with the wishes of my classmates.

Terry Vander Werff

The President must be versatile and omniscient, one who can cope with new problems. He must be able to effectively represent his class on Inscomm. My activities, which include Finance Board, Conference Committee, IFC, and PRC, have given me a unique understanding of problems and opportunities facing our class and the whole student body. I am prepared to share with you the experiences and knowledge I have acquired, and respectfully seek your support in this election so that I may provide the effective, dynamic leadership our class will need this year and next.

Class of '68

George Piccigal

In my campaign statement last year I emphasized the need for class communication. This year that emphasis was vindicated by the outstanding work done on Field Day. Official written communication was not in keeping with our plan to keep '68 in the dark—instead we used an extensive“grapevine." The results are now history. No other class has succeeded in destroying its opponents' project, nor has any class turned out in strength as we did—a evidence of what this class can do when properly organized.

The class of '67 is one of the few to be in the black at this time. With our upcoming spring and continued class unity, we plan the most successful Field Day ever. This year has been a most successful year, with greater involvement of class members. The unity of our class is unparalleled in MIT history. With your support we can continue to achieve.

Steve Douglas

Junior Prem gives the Class of 1967 the opportunity to put on an enjoyable weekend at a reasonable price. I have experience in the various facets of J.P. and as President would be willing to put in every bit of time necessary to make it a successful event.

In addition, the President's seat on Inscomm is the only official vote of the class in student government at the Institute level. As President I would keep close track with your opinions through polls and personal contact and, as important, would keep you regularly informed of Inscomm proceedings.

Jerry Tomaneck

This is just a letter. Jerry Tomaneck, asking your vote on the basis of what I have done as a preview to what I can do for you. I have been around and made full use of Student Center and the new government. My experience as chairman of four committees, member of Secrecy, and, important to this election, secretary of Spring Weekend Committee enables me to put on an enjoyable weekend at a reasonable price. I have already reserved ballrooms, saving you money, practiced government with many people. I now ask your vote to continue.
