The Department of Air Science has announced a new Air Force ROTC program which allows students with two academic years remaining to begin flight training the summer after their sophomore year. This program was created especially for one-all-expense-paid year of flight training abroad in a foreign country. All expenses paid will also include the cost of travel and additional expenses while in the foreign country. Further allowances are guaranteed for educational expenses incurred by the country of study; candidates will be allowed to bring a family to the foreign country. For additional information on this new program, interested students contact the Department of Air Science.

Boston Rotary Club announces new year foreign fellowships

The Boston Rotary announced recently that it will be offering International Foundation Fellowships for the academic year 1965-66.

The purpose of these fellowships is "to give one all-expense-paid year of graduate study abroad in a foreign country. Further allowances are guaranteed for educational expenses incurred by the country of study; candidates will be allowed to bring a family to the foreign country. For additional information on this new program, interested students contact the Department of Air Science.

New ROTC program

AF offers two-year plan

The Department of Air Science has announced a new Air Force ROTC program which allows students with two academic years remaining, beginning with September 1964, to receive an award in order to complete the requirements for a commission in the United States Air Force.

To be eligible for the program, male students must apply for the program and continue the Air Force Officer Qualification Tests and complete the officer commissioning physical examination. The student will be interviewed by a representative of the Department of Air Science.

The Department of Air Science will conduct an interview with each student who applies for the program and is selected by the Department of Air Science.

APO, TCA and Red Cross join in annual drive

Alpha Phi Omega (APO) serves the fraternity and the Technology Community Association (TCA) will be soliciting donations for the Red Cross blood drive to take place March 22 to 26.

Donations for the campus drive will be solicited from students beginning February 23.

Gladstone Gay, of Baker House, will be organizing solicitations in the dormitories: he is a representative of Alpha Phi Omega. Paul Lindsay, of Lambdchi Alpha, will oversee solicitations in the fraternities on behalf of TCA. Together they hope to bring in 1710 pints of blood.

Last year’s drive drew 1300 pints of blood, which represented a record high for the amount of blood accumulated at any single location on the Eastern Seaboard during peacetime. Gay and Lindsay have pointed out that prospective donors had to be turned away last year because of insufficient facilities and staff. However, this year’s plans call for increased facilities and twice as many staff members, so that everyone who wishes to donate can be accommodated.

It is also significant to note that the blood drive will be conducted at a time when the Maimonides Hospital blood bank supply is normally low. The contribution from MIT will form a large percentage of the annual supply of blood during a two week period.

Blood will be taken in room T-341, formerly the Office of the Registrar. During solicitation week, there will be an informational table in the lobby of Building 10. Parents’ consent is needed for students under 21, unless they give blood in last year’s drive.

Comming: February 23 & 24, 1965

HUGHES announces campus interviews for Electronics Engineers and Physicists receiving B.S., M.S., or Ph.D. degrees.
