Walker Assembly Ball scheduled by staff for Friday, April 23

The thirty-first annual Francis J. Amore Walker Assembly Ball will be presented Friday, April 23 in Walker Memorial, by the Walker Student Staff.

Members of the administration, faculty, students and alumni of the Walker staff will attend the white tie affair, MIT's most elegant evening. The ball is closed fot invitations are available only from members of the Walker staff.

The evening will begin as the Parish House doormen greet ravishing guests at the foot of the red-carpeted front steps of Walker Memorial. An A-Ball usher will then escort the couple under the 30 foot canopy to the front door, through the registration procedure, and through the receiving line of many Institute dignitaries.

Dancing to music by Rolly New- man and his orchestra begins at 10:00. Several times during the evening the houselights will dim and the Assembly banner's fanfare will announce another entertainment presentation.

The highlight of the evening is the Grand Promenade at midnight headed by President and Mrs. Simmons. Shortly afterward guests will enjoy a buffet served in F-26.

Dancing until 3, interrupted only by entertainment presentations. And be sure to leave F-26 until the evening will complete the evening.

Conference serve educational purposes

By Jim Taylor

The purpose of the International Conference of Students was to bring together young men and women from unique societies with different backgrounds and diverse interests to discuss broad problems of university education. There was no intention of solving these problems. This was less a "working" than a "thinking" conference. Several times during the evening the houselights will dim and the Assembly banner's fanfare will announce another entertainment presentation.

Graduated was only the beginning of Jim Brown's education

Jim Brown, Northwestern University, '63, came with a challenge. He had heard about the Company's concern for the continued development of its engineers after college graduation.

Jim has his degree in industrial engineering and is continuing to learn and grow in professional stature through the Electric's Graduate Engineering Training Program. The objective of this educational philosophy of this Program are the best of academic traditions, designed for both experienced and new engineers.

Like other Western Electric engineers, Jim started out in this Program with a six-week course to help in the transition from the classroom to industry. Since then, Jim Brown has continued to take courses that will help him keep up with the newest engineering techniques in communications.

This training, together with formal college engineering studies, should enable him to develop his talents to the fullest extent. Responsibilities include the solution of engineering problems, selection of materials, design, and in the case of Jim, the development of new and improved products. But the most important is his ability to use his strong technical background and creative ability to solve problems of university education.

Jim Taylor is the second year for the service. His day-to-day tasks include the MIT community with sales of New York Times, the Boston Herald, and other newspapers and magazines.

TSE noted that a new unconstrained framework is determining what services are desired and in going about arranging for the promotions and delivery of the periodicals. This is the second year for the service. The service agency for TSE and provides the MIT community with sales of New York Times, the Boston Herald, and other newspapers and magazines.

She said, "When I consider this idea in the perspective and a greater appreciation for the movement of sending representatives to intercollegiate conferences. It is an educational experience to attend such gatherings of students and to have the opportunity of seeing the other students. This is a typical experience for students at Cornell was an excellent example of what I consider to be a valuable experience for students. As I hope I've been able to point out, this experience can favorably affect both the schools involved in it and the students who participate. There is every indication that the entire program will be carefully planned and well executed. In summary, I feel that the program has been successful. In our opinion, the experience was not generated last year as students organized for a major intercollegiate conference. The success of such an event was demonstrated last fall by the AWS Symposium on Women in Science and Engineering. This lead will be difficult to follow but the home office is looking for a new manager and plans for a major intercollegiate conference.
