Straton a Tech man since 1920, undergraduate to president

### MIT publishes book on Soviet research

Alexandre G. Vorobey, a Research Associate at the Center for International Studies, has published a book on Soviet science published by the MIT Press.

### Building Thirteen dedication Oct. 1

The dedication for the newly constructed Student Center building will take place on October 1. Dr. Stratton, a Tech man since 1920, will take the building's name for the current President, Julius Adams Stratton, Class of 1923, eleventh president of the Massachusetts Institute of Technology, in grateful appreciation of his lifelong concern for the students of MIT. The building will be dedicated with a formal dedication ceremony at 3:00 p.m. Formal ceremonies honoring Dr. Stratton will be held at the building's opening at 2:15 p.m., October 3. The Installation Committee of the MIT Corporation and former President, and Dean Robert Holden, is a member of the faculty, will host the occasion. Dr. Stratton and friends are expected to attend.

A special cocktail reception and the Corporation and Committee for the Day will be held at the building's opening for the students of MIT. The building will be named for the current President, and the program for the dedication ceremony will consist of speeches for the institution and the role of fraternities at MIT.

### SC dedication

**Concert, dance planned**

The Student Center is being dedicated with a formal dedication ceremony on October 1st, and the Student Center will be open for breakfast and lunch.

**Student Center activity to increase as construction nears completion**

Construction delays have held up the full utilization of the new Student Center, but an activity schedule is to be observed in the coming weeks. Starting tomorrow, the regular dining facilities of the center will be open for lunch and dinner.

**Activities to move**

The activities which are housed on the fourth floor of the Student Center will be moved in next week and will be operational by the time the Center opens in October. The Center will be open from 8 a.m. to 10 p.m.

**Lunar Module**

The lunar module will be presented on consecutive Thursdays, starting with "Landing on the Moon" on Dec. 3. This program was taped last August at Grumman Aircraft Engineering Corporation, Bethpage, Long Island. It will cover the 1969 Moon landings and will be presented on consecutive Thursdays.

**WGBH to produce series on current scientific events**

by Don Addo

WGBH, Boston's educational television station, has received a $75,000 grant from the American Association for the Advancement of Science (AAAS) to produce programs of MIT Science Reporters, a series of 11 half-hour programs on recent events of scientific importance and will be hosted by John Fitch, Minn.

Mr. John Fitch

Grumman will also be the scene of a series of presentations on current scientific events. Produced by WGBH, the show will be presented on MIT Science Reporters, a series of 11 half-hour programs of current scientific events. WGBH will deal with the orbital dynamics of the Lunar Excursion Module (LEM) and the only American vehicle that will be launched from the moon's surface. The home movies and the Lunar Module will be presented on consecutive Thursdays, starting with "Landing on the Moon" on Dec. 3. All programs will be taped last August at Grumman Aircraft Engineering Corporation, Bethpage, Long Island. It will cover the 1969 Moon landings and will be presented on consecutive Thursdays.
