Lack of student-school relations prompted Stratton's concern.

(Continued from page 1)

...educational policy.

His first hard decision came when he had to make the head of his lab, first of all at MIT. He was moving up in the world, but away from students. However, he managed to continue teaching, 8:30 through 9:10 until his appointment as Provost in 1939.

Administrative post

As Provost, Dr. Stratton was primarily concerned with research and educational administration, but he still kept what he regarded as personal service contact with students. Finally, in 1959, he was appointed as MIT's 12th President; his address on that occasion, quoted on the Student Center inscription, indicates his place for creating a better environment for education in the fullest sense that he himself enjoyed.

A Dream realized

Three years later, in 1962, he reported that "The proposed Student Center is in my judgment the most important single undetermined objective of the Second Century Program." He directed his efforts to the realization of the plans that had been growing since 1961; a year later, in May 1963, he assisted UAP-Woody Bowman at the groundbreaking of the building.

On that occasion, he told the students: "The Student Center will provide a proper focus for student-school relations, a proper focus for an educational policy.

Dr. Phillips W. Robbins has won the $1,000 American Chemical Society Award in Biochemistry for his work in the Physical Chemistry of Antigen-antibody Interactions. Born in Barre, Mass., Dr. Robbins graduated from Depauw University in 1952 and received his Ph. D. from the University of Illinois in 1955. He was a research associate at Mass. General Hospital and a professor of biochemistry at the Rockefeller Institute in New York before coming here in 1959 as an assistant professor of biochemistry. He was named associate professor in 1962.

The award will be presented next spring at the American Chemical Society's 131st national meeting in Pittsburgh.

The most walked about slacks on Campus are HUBBARD slacks with "DACRON"! Great Hubbard styling with the lasting neatness and care-free comfort of "dacron," in these slacks a 55% Dacron polyester, 45% worsted wool. Stylized in traditional Classic and Gay Blade plain front models, in all the favorite colors, at better stores everywhere. Also available in blends of 70% Orlon acrylic, 30% worsted wool, or "Dacron" with "Orlon." (no Pont Reg. T.M.)

HUBBARD

schedules brunch Sunday

MIT Hillel will hold a brunch in the new student center this Sunday, September 26. It is designed to acquaint the Jewish freshmen of the MIT community with the Director of Hillel, Rabbi Herman Pollack, and with the executive and committee chairman.

The brunch will begin at 10:30 a.m. and will be followed by a lecture and a Q & A panel. Messengers and non-members are invited to attend.

Christian Science lecture

8:00 P.M., Friday, October 1
Bush Room 10-105
Sponsored by Christian Science Organization at MIT
