By Dana Asdor

The MIT Humanities Department, which has two visiting professors this year, the distinguished novelist William Humphrey and the noted anthropologist Harold Garfinkel, will present a series of lectures on the university campus.

William Humphrey, born in 1931, studied literature at Southern Methodist University and the University of Texas without getting a degree. He taught at Bard College, Wesleyan University, and various other places before turning to writing novels. In 1958 Humphrey came out with "The Westerner," a novel, which achieved national attention. Since then his works have included "The General," a novel, and "The Love of the Lost," a collection of short stories. His most recent novel, "The M瞑," is a sequel to his first novel, "The Westerner." Humphrey is currently working on a new novel, "The Journey," which is scheduled for publication in 1966.

Harold Garfinkel, born in 1917, is a professor of sociology at the University of California at Berkeley. He is the author of "The Presentation of Self in Everyday Life," a book which has had a significant impact on the field of social psychology.

Visiting professors

Humphrey, Ross

David Hoffman

A new joint session of the MIT Department of Mathematics and the MIT Department of Science and Engineering will be held on December 3rd, beginning at 5:30 pm in Kresge Auditorium. The session will be open to the public and will feature a series of talks on various topics in mathematics and science.

The first talk will be given by Dr. John Nash, a professor of mathematics at Princeton University. His talk will be titled "The Geometry of Nonlinear Equations" and will focus on the use of geometric techniques in solving nonlinear equations.

The second talk will be given by Dr. Robert Shapley, a professor of computer science at the Massachusetts Institute of Technology. His talk will be titled "The Theory of Computation" and will discuss the fundamental concepts of computation and their implications for the design of algorithms.

The third talk will be given by Dr. Pauline Gagnon, a professor of biology at the University of California at Los Angeles. Her talk will be titled "The Physiology of the Nervous System" and will explore the basic mechanisms of neural communication.

The fourth and final talk will be given by Dr. Janet Smiley, a professor of psychology at the University of California at Berkeley. Her talk will be titled "The Psychology of Social Perception" and will examine the role of perception in social interaction.

Humphrey will be giving a special talk on "The Westerner," a novel, which has achieved national attention. Since then his works have included "The Love of the Lost," a collection of short stories. His most recent novel, "The M瞑," is a sequel to his first novel, "The Westerner." Humphrey is currently working on a new novel, "The Journey," which is scheduled for publication in 1966.

NOW IN BUILDING 7

FINNISH PHOTOS EXHIBITED

By Jeff Reese

A photographic exhibition of masterpieces by Finland's leading architect, Alvar Aalto, will be on view at Building 7 in the first floor corridor until October 16. Most of the photographs, both in color and black and white, are by G. E. Kallberg Smith, who also wrote the introductory text and captions. Mr. Smith, winner of the Finnish Government Award, is the first time.

"The internationally renowned Finnish architect, one of the figures of American freedom, is Alvar Aalto. He will be teaching two courses this year at MIT. Aalto, who is 65, will be teaching the course on "The Presentation of Self in Everyday Life," which will be held in Kresge Auditorium on Tuesday, November 29, beginning at 5:30 pm. Aalto will also be teaching the course on "The Theory of Computation," which will be held in Kresge Auditorium on Thursday, November 30, beginning at 5:30 pm.

The need for new materials is causing architects设计师 to develop new designs (See turn to Page 2)

Course 21 offers two new subjects

The MIT Humanities Department is offering two new subjects in 1965-66. One of the new subjects is "The Presentation of Self in Everyday Life," which will be taught by Dr. Robert Shapley. The other is "The Psychology of Social Perception," which will be taught by Dr. Janet Smiley.

The Origins of the Novel, designated as 21.159, will be taught by Professors William Humphrey and Ross Jeffries. The course will cover the origins of the novel and its development through the centuries, with a focus on the major works of literature from the 17th and 18th centuries. The course meets on Monday and Wednesday from 4:00 to 5:30 pm in Building 7.

No. 1 in 'Playboy'

Gene Wright, number 1 bass. The chairman on campus will now be able to do so by contacting class chairmen Ken Browning at SAE House, 6-7, or John Freeman at Phi Gamma Delta.

Cannonball Adderley Sextet in concert here!

Alph P. Omega, in cooperation with the Student Center Dolf, presents the Cannonball Adderley Sextet at its concert. The concert will be held in Kresge Plaza at 5:30 pm on October 16. A limited number of tickets will be available at the door.

Here's Dave Brubeck's Quartet: Eugene Wright on bass, the "Once in a Blue Moon" rhythm section, and himself. (He plays piano.) They'll swing into Kresge Auditorium for a concert on December 3rd.

The new fully completed Building Thirteen will be dedicated on Friday. The building cost six million dollars and was dedicated by the firm of Sidesloch, Owings & Merrill. It is parallel to and north of the Student Center.
