Letters to The Tech

TEN replies

I am also excited to note that you had pointed out that TEN's reason for existence has included financial difficulties — in fact, it has been a mainstay of the problems which you imply are inherent in a college newspaper. In the past year and a half, the ten staff members have worked hard to use every possible source of copy available to them, including the undergraduate source of copy. Indeed, it was a primary reason for The Tech's increased circulation in recent years that it was able to attract new students and staff members to the paper. The Tech has been building a new staff in recent years, in order to expand the scope of its coverage.

Next, you accuse TEN of “editing” its readers, implying that this is a serious matter. Such an accusation is more than a little disturbing, as it is precisely this kind of speech that the Ten editorial board is trying to encourage. The Tech's role is to act as a forum for the exchange of ideas and opinions, and to provide a platform for the discussion of issues of local and national interest.

TEN is a student-run newspaper and it is the role of newspapers, especially student newspapers, to provide a platform for the discussion of issues. The Tech has always been a platform for the discussion of issues, and it continues to be so today. The Tech is a forum for the expression of a range of views, and it is the responsibility of the Tech staff to ensure that the views expressed are accurate and fair.

Our readers readers the changes in format that will occur. There will be more sports and entertainment, a front page, and more coverage. We’ll be experimenting at first, but we hope to establish a consistent identity and course of action.

This term we have tried to publish all events on campus in our new format, and we will continue to do so, whenever possible. It is our hope that when the Tech becomes a weekly, it will be easier to publish all events on campus.
