Want to be a big hero? Then look for big challenges!

Come to General Electric, where the young men are important men.

Important responsibilities come to you early at G.E.

You could find yourself on the team responsible for marketing a new appliance. Or you could be in India, installing a nuclear power plant. Or in a laboratory, looking for applications for a remarkable new "artificial gill" that lets mammals breathe under water.

This is a worldwide company that makes over 200,000 different products, from jet engines and weather satellites to computers and color TV. In this kind of company, you have to be very good to get very far.

If you are good, you'll be rewarded. With money, of course. But with responsibility, too. The most important job you'll ever have is your first job.

And the most important job interview you may ever have is with the man from G.E.
