The Finance Board has decided to meet the financial operations for the fall term. Interested parties may contact Gordon Logan, IFC Social Chair, at Delta Tau Delta (x 3714) for more information.

The Finance Board this week outlined information to all area fraternity chairmen and treasurers concerning the student Senate. All activities are required to submit statements to the Finance Board by Monday, February 25. Any questions on this matter should be directed to Gene Sherman, Finance Board chairman, x 2696. There is an opportunity for a number of students to participate in the functioning of the Finance Board during the next few weeks. The Board will be selecting extra staff to obtain an inventory and total capitalization picture of the entire undergraduate association. Interested workers should attend the orientation session on Saturday at 5 pm in W2-MH.

The Finance Board has decided that such information on the operations of all activities is vital for an adequate picture of the financial status of the Undergraduate Association. All activities are required to submit such statements to the Finance Board by Monday, February 25. Any questions on this matter should be directed to Gene Sherman, Finance Board chairman, x 2696.

Fall financial statements issued; Finboard plans inventory study

Engineers and Scientists: Let's talk about a career at Boeing...

50-year leader in aerospace technology

Campus Interviews, Wednesday through Friday, February 23 through 25

The most effective way to evaluate a company in terms of its potential for dynamic career growth is to examine its past record, its current status, and its prospects and planning for the future, together with the professional climate it offers for the development of your individual capabilities. Boeing, which in 1909 completed 59 years of unmatched achievement and leadership, offers you career opportunities as diverse as its activities and varied backlog. Whether your interests lie in the field of commercial jet airliners of the future or in space-flight technology, you can find at Boeing an opening which combines professional challenges and long-range stability.

The men of Boeing are today pioneering evolutionary advances in both civil and military aviation, as well as in space programs of such historic importance as America's first moon landing. Missiles, space vehicles, gas turbine engines, transport helicopters, military and basic research are other areas of Boeing activity. There's a spot where your talents can mature and grow at Boeing, in research, design, test, manufacturing or administration.

The company's position as world leader in jet transportation provides a measure of the caliber of people with whom you would work. In addition, Boeing people work in small groups, where initiative and ability get maximum exposure. Boeing encourages participation in the company-paid Graduate Study Program at leading colleges and universities near company installations.

We're looking forward to meeting engineering, mathematics and science seniors and graduate students during our visit to your campus. Make an appointment at your placement office. Boeing is an equal opportunity employer.
