Kinsella, Bender to head IFC Executive Board

By Harvey Allen

At its annual Executive Board election meeting Thursday night, the Intramural Fraternity Council elected Kevin Kinsella ’67 of Sigma Nu as Chairman. Doug Benson ’71 of Alpha Tau Omega ’67 was elected Vice-Chairman. In addition, Peter Dolan ’68 of Kappa Sigma was elected Purchasing Manager and Tom Nolan ’66 of Phi Delta Theta is the new Treasurer.

The IFC Secretary will be appointed by the new Executive Board at its first meeting. In his acceptance speech, Kinsella recalled the achievements of the IFC this year, stressing the Blood Drive and the social functions. He pointed out, however, that the IFC could not afford to rest on its laurels, but must continue to strive forward.

Since Deansshore in reviewing Kinsella stated, “The unfriendly cost between us and the Institute is being severed... we must demonstrate that the price of auton-omy is responsibility.”

Chairman of the IFC Executive Board, Bob Langer ’68 and Vice-Chairman Al Cohen ’68.

Newly-proposed Inner Belt Route to eliminate many MIT buildings

By Mark robot

In a statement concerning the recommended Inner Belt highway route, Dr. James R. Killian, Jr., Chairman of the MIT Corporation, said, “After careful study, MIT has concluded that it has no choice but to oppose with all the vigor at its command the Inner Belt highway route recommended by Barton-Aschman Associates to the Cambridge City Council or similar routes which have been proposed involving the railroad tracks or MIT property in areas north of the railroad.

Catastrophic effects

Such routes would have catastrophic effects on MIT, since many of its visibly important facilities are threatened by the route for the Inner Belt highway route recommended by Barton-Aschman Associates to the Cambridge City Council or similar routes which have been proposed involving the railroad tracks or MIT property in areas north of the railroad.

Research buildings lost

An immediate effect of the railroad route would be the elimination of buildings which now house vitally important teaching and research activities. Scores of doctoral students, a key to our nation’s future, would be interrupted in their theses, in many cases cutting their research and educational careers short. The Cambridge City Council held a hearing open to the public last night to determine how the people feel about the Barton-Aschman report. Kinsella stated, “The umbilical cord between us and the Institute is being severed... we must demonstrate that the price of autonomy is responsibility.”

IFC Executive Board Kinsella, Benson

At its annual Executive Board election meeting Thursday night, the IFC elected Kevin Kinsella ’67 of Sigma Nu as Chairman. Doug Benson ’71 of Alpha Tau Omega ’67 was elected Vice-Chairman. In addition, Peter Dolan ’68 of Kappa Sigma was elected Purchasing Manager and Tom Nolan ’66 of Phi Delta Theta is the new Treasurer.

CAMBRIDGE CITY COUNCIL DISCUSSES NEW ROUTE FOR INNER BELT HIGHWAY

The Cambridge City Council has until March 1 to determine if it plans to recommend that the State Department of Public Works ac-

cept the Barton-Aschman proposal for the Inner Belt highway which runs through many of the research buildings on the northern boundary of MIT.

If City Council decides to accept this route, then the DPW will make its selection from five plans, including an elevated route above the railroad tracks, a de-

Building on highway route

The MIT Nuclear Reactor is one of many buildings threatened by the route for the Inner Belt highway proposed by the Barton-Aschman Asso-
ciates. Present demand for facilities is so great that the reactor is in use 24 hours a day.

The recent addition to the reactor is a painting tower which was enlarged last year.

The High Voltage Research Laboratory is a center for the treatment of cancer by electron and x-ray radiation. The laboratory moved to its present building only a year ago, 10,000 treatments are given each year; most of this treatment is provided in collaboration with the Lakesy Clinic of Boston.

Benefactor Sloan dies

By John Corsini

Alfred P. Sloan, Jr., Chairman of the Foundation which bears his name, died Thursday night. Dr. Julius A. Stratton, President of MIT, issued the following statement concerning Mr. Sloan’s death:

“Many years ago, our President, in expressing my sorrow at the passing of an outstanding alumnus, said, ‘I know that I speak for all of MIT in expressing our sorrow at the passing of an outstanding alumnus, Alfred P. Sloan, Jr.’ And it is with this same conviction that I speak for all of MIT in expressing our sorrow at the passing of Alfred P. Sloan, Jr."

“We have always been impressed by the fact that each of our presidents has had a unique vision of what MIT could be and should be. And Mr. Sloan, too, had a vision, a vision that was greater than his own, a vision of what MIT could be and should be.”

“Mr. Sloan’s commitment to MIT was steadfast and unwavering. He believed in the potential and promise of MIT, and he invested in that potential and promise with his time, his energy, and his financial resources. He was a true friend and supporter of MIT, and we will always remember him for his contributions to the Institute.”

“Mr. Sloan was a man of vision and dedication, a man of extraordinary ability, and a man of tremendous impact on MIT. He was a true friend and supporter of MIT, and we will always remember him for his contributions to the Institute.”

“Mr. Sloan was a man of vision and dedication, a man of extraordinary ability, and a man of tremendous impact on MIT. He was a true friend and supporter of MIT, and we will always remember him for his contributions to the Institute.”
