Five compete for Undergraduate Association President

Nygreen

(Continued from Page 1) priority comments; (b) the planned
abolishing of some dormitories
because of minor and recurring
problems, but also the fact that
in the end, the solutions will be
administrative decisions.

Realizing that it is the role
of student government to offer feed-
back of opinion to the administra-
tion in a mature way, I should
take the formation of temporary
ad hoc, fact-finding commit-
tee—the same way problems of
similar nature have been effec-
tively handled in the past. On
this point I oppose any extreme
grouping of these problems into
an all-inclusive study committee.

a) SCEP—The importance
and uniqueness of SCEP begins to
be realized as the committee com-
pletes its studies in various areas.
In order to fully maximize the
potential of SCEP, I should like
to see the committee's advisory
status retained after a slight structural
revision. I would urge SCEP to
undertake projects such as eval-
uation of professors and comments
on the curriculum revisions.

b) PRH—The PRH film made
realize the importance we attach
to the UAP and other student ac-
tivities. Its work is di-
ary, ad hoc, fact-finding commit-
tee that in practice can ac-
complish what is necessary. To
this end, I should like to serve
the Undergraduate Association as
VAP.

March

(Continued from Page 1)

radical UAP can accomplish
nothing. With a new MIT presi-
dent and a new Office of Uni-
versity Government, this can be
accomplished. A good start is a
effort to relate the work of the
Student Center to the student
body. This use of diplomacy instead
of negotiation not force. This is par-
true interests of the students. al-
though this will require much
more work, it is the only way to
get things accomplished.

There are still many physical
problems to be solved. The ele-
vator button, exhaust fan in the
Grimo Room, and poor lighting in
the campus are all a few of these
problems. There are also
many questions of a broader na-
ture. Examples are how to get
groups to make better use of the
library and the lounge and dance
areas, and often do not concern
the UAP or other student ac-
tivities. Its work is di-
ary, ad hoc, fact-finding commit-
tee that in practice can ac-
complish what is necessary. To
this end, I should like to serve
the Undergraduate Association as
VAP.

Academic Problems

The Institute has a fairly com-
prehensive freshmen advisory pro-
gram, but after the freshman year
very little advisory contact is pro-
vided for. The question of whether
to clear this path, and ask
their prospective action.
