Talking Rock
By Don Davis

A switch of labels seemed to be just what the Righteous Brothers needed. After a gradual decline on Phil Spector's Phillips label it's their poorest record, a revival at Reprise gives them new life. 'Lo and behold, they switched to A & R.'

You're competitive, it's a game—if you're nostalgic, it's an agony.

Two British movies this week

By David Gross

The London manager has announced that Richard Lester's 'The Knack' tonight. This is one of the more interesting results of the cinematic 'new wave' pioneered by Truffaut and Godard. It is the slight story of two Londoners, one who possesses the 'knack' for attracting females, one who doesn't, and their chance meeting with a young, out-of-town girl innocently searching for the local YWCA. Starting with the very successful play by Ann Jel- lose, Lester has provided us with a dazzling display of the director's technique. In fact, this aspect so dominates the film that it is questionable whether it has any further raison d'être. Even if it is, true, the film is certainly worth being seen by any interested in the development of the cinema in recent years. The acting, by Bill Travershaw and others, is adequate.

Tomorrow, the 007 fans will have the opportunity of seeing Sean Connery in a drama. 'The Hill' he plays the part of a prisoner in a British stockade. Sean Connery proves to the moviegoer that he is an actor who can handle more than one type of role.

1. If you have three apples, and you want to divide them among four of you, how much does each one get?

4. You might become an actor. It's a challenging, responsible job—and you can make a lot of dough.

5. At Equitable, they even pay you for parking!

Soma one, I don't like apples.

2. You're not much for rash either.

On the contrary, I once went through a whole semester of calculus—after Phys. Ed. closed on me during registration.

3. What are you going to do with all that knowledge?

Do you need calculus to manufacture fortune cookies?

A big income is one of my fondest ambitions.
