weekly magazines. The camp was started a year ago by MIT for boys in its 7th grade. Last summer's program met with such success that by request of the campers, Saturday classes were scheduled throughout the school year. Since the beginning of this year, the MIT Science Day Camp has been substituted in part by the Other School at the Charles River. Two classes made up of boys from Cambridge, and a third class made up of boys from Boston.

The basic aim of the camp is to assist in developing the learning abilities of the boys to the extent that they will be able to enter college. The same group, plus additional classes each year, can continue in the program until their graduation from high school. Though nearly all of the boys come from Cambridge, several from Boston and a few from the suburbs.

The MIT Science Day Camp was organized under the auspices of the MIT Committee on Community Service and the student Social Service Committee. Faculty director is Dr. Warren B. Brophy. Student co-chairmen are Richard Albritton and Michael Eron. One undergraduate counselor is assigned to each group of four to six campers. The counselor at each school class with his campers, helps them, and with any questions they may have and acts as a strong bond between the camp and the school. The camp involves the families of the campers and the students. Active involvement of the families is essential to fulfillment of the camp's aims.

Wednesday Trips
On Wednesdays the regular schedule is suspended and counselors and campers take to the road on field trips. Using the criteria that field trips must be entertaining as well as educational, the schedule for this week was made up of Emma's Wild Animal Farm, Plymouth, the Plum Island Wildlife Preserve, Marblehead Village, the Canada Dry plant and a newspaper office. The MIT Science Day Camp faculty have taught in the other School at the Charles River. Two classes made up of boys from Cambridge, and a third class made up of boys from Boston.
