Please don’t zlupf Sprite. It makes plenty of noise all by itself.

Sprite, you recall, is the soft drink that can make a soft drink go with a loud zlupf. It’s the sound that some say is not soft at all. It’s the sound that some say is so soft, you can’t hear it.

But Sprite is not just a soft drink. It’s a sound that is not to be missed. It’s a sound that is not to be ignored. It’s a sound that is not to be taken lightly.
