Peace Corps seeks volunteers

A group of ten former Peace Corps Volunteers presently studying on the MIT campus have organized themselves to handle Peace Corps recruiting at MIT this year.

They are working in cooperation with Miss Sally Hames of the Placement Office and with the Foreign Opportunities Committee.

Their first activity will be an informal "Office and Conversation" to be held tomorrow evening at 7:30 in the Menziane Game Room of the Student Center. This meeting will provide an opportunity for members of the MIT community to meet returned volunteers to discuss informally the challenges and opportunities offered by the Peace Corps.

In the future, the group hopes to organize seminar discussions and exhibits dealing particularly with science and the developing world.

In the past five years, more than 65 MIT students have served in the Peace Corps in some twenty countries. Three of the presently returned volunteers were previously students at MIT, who have returned for graduate work.

In the past, the Peace Corps recruiting has featured an intensive period of recruitment by outsiders, according to John Raisce, coordinator of the group. However, he hopes that in the future reality with those interested in the campus will be able to meet directly with those interested in the Peace Corps throughout the year.

Anyone who would like further information should contact Miss Sally Hames at the placement office or John Raisce at 886-3769.

after 5 p.m.

New siding club seeks members

Several students are currently organizing an on-campus ski club. What they intend to do is coordinate weekend skiers so that discounts may be obtained. They will also organize several trips.

If you are interested in becoming a member of this all club, fill out a form at the booth in Building 10, today or tomorrow.

After December 18...

The Tech Coop Lobby Shop will no longer be open on Sundays after December 18th. Otherwise, regular store hours will prevail.

Pass the word.

OUR 50TH ANNIVERSARY YEAR

Last year, thousands of lawyers, bankers, accountants, engineers, doctors and businessmen went back to college.

And not just for the football games.

We'd like to clear up what appears to be a misunderstanding. It is somewhat popular on campus to decry a business career on the grounds that you stop learning once you start working for Cliche Nuts & Bolts.

That idea is groundless. We can't speak for Cliche, but we can for ourselves-Western Electric, the manufacturing and supply unit of the Bell System. 6 out of 10 college graduates who have attended our engineering study, under the direction of Lehigh University, is conducted at our Engineering Research Center in Princeton, N. J. Selected employees are sent there from all over the country for a year's concentrated study leading to a master's degree.

You get the idea. We're for more learning in our business. After all, Western Electric doesn't make buggy whips. We make advanced communications equipment. And the Bell telephone network will need even more sophisticated devices by the time your fifth reunion rolls around.

The state of the art, never static, is where the action is.

At Western Electric, what's happening is the excitement and satisfaction of continued doing and learning. If this happens to appeal to you, no matter what degree you're aiming for, check us out. And grab a piece of the action.
