Meet the only man at M.I.T. with 139 jets.
Jeffrey Silverman, TWA Campus Representative

He's the guy to know when it comes to travel. TWA specially trained him to make it easy for you to go places in the U.S. and to Europe. Across Asia. He's the man to see for TWA 50/50 Club cards—you can get 'em right on the spot. Working with your local travel agent, he can help you with travel plans, tours, schedules, fares, ticket arrangements—all on campus.

Easy? Just call Jeff at 232-3525. Tell him where you want to go—and he'll warm up a jet.

Welcome to the world of Trans World Airlines

Course VI

Below are listed some additional laboratory courses that are offered in the Spring 1967 term which did not appear in the catalog.

6.711 - Digital Systems
Project Laboratory
Prereq.: 6.70, 6.01 (Prof. Traveler) Year: U Limited enrollment

6.712 - Electrodynamics
Prereq.: 6.70, 6.01, and 6.02, or 6.711

6.713 - Communications Systems
Project Laboratory
Prereq.: 6.70, 6.01

6.714 - Electronic Measurements
Prereq.: 6.02 (Prof. Elfinger)

6.715 - Electromechanics
Prereq.: 6.70, 6.01, and 6.02, or 6.711

6.716 - Particle Optics
Prereq.: 6.70, 6.02 (Prof. Crawford)

6.717 - Audio Frequency Communications
Project Laboratory
Prereq.: 6.01, or (Prof. Morehouse)

The above courses are mainly offered for those students who already have a good background in the subject matter. For students who wish to take courses in other areas, please consult the instructors listed on the registration day, if interested in these courses.

Shannon named in 1958 to Donner professorship
(Continued from Page 1)

Following graduation, Professor Shannon joined the staff of the Bell Telephone Laboratories, where he did research combining mathematics and electronics in the study of the relationship between man and his environment. He had done this before in his early teaching at the University of Michigan and the Massachusetts Institute of Technology.

Shannon was named to the post of Bell Professor in 1955 after he returned to the University of Michigan after World War II. In 1956, he was named to the post of Bell Professor of Communications. He was the first to make a major contribution to the field of communications.
