DuPont grants MIT $33,000 for advanced research

MIT has been awarded a total of $33,000 by the duPont Company for the advancement of research and graduate study in several fields. The awards will go to advanced graduate students who are interested in teaching chemistry, chemical engineering, physics, or chemical engineering on the college level. Award recipients will receive $1,000 each, an additional $1,500 award to be divided among themselves for their respective departments. Each department may use the grant to support any work of its choosing.

The awards are part of the duPont Company's annual program. Between 1958 and 1962, duPont has awarded $3,100,000 to 214 colleges and universities for the advancement of research and graduate work at the college level. Grants specifically for teaching totaled $655,000 in 1967.

Dr. Lenard Katz, he characterizes Dahl as "an outstanding contributor to research and teaching on the college level. Award recipients will receive $1,000 each, an additional $1,500 award to be divided among themselves for their respective departments.
