**Photocircuits**

Corporation

Cranston, Rhode Island

**Freshman courses change; too few postpone physics**

Don Fischer (MIT '53, Harvard MBA '59) is manager of corporate planning and systems. He's in his mid-thirties. He works at Photocircuits.

Don had his pick of jobs but chose Photocircuits. For a good reason. Today he's Manager of Corporate Planning and Systems — quite a responsibility for a guy in his mid-thirties. But Don can handle it. That's why Photocircuits picked him for this key management position. For Don, it's paid off handomely. Besides enjoying plenty of personal fulfillment and job satisfaction, Don gets a tremendous kick out of changing the face of the art in the state of being. So will you.

By the way, Photocircuits is one of the world's largest independent manufacturers of printed circuit boards. We also make printed armature motors and data processing equipment. All three are exciting, fast-growing fields. More important, Photocircuits itself is growing fast. And we've expanded our plant seven times and our annual growth exceeds the electronics industry average. And we've done all of these things since 1951.

We're growing — but not so big or so fast that you'll feel lost in the shuffle — or wind up in dead-enders — or be known by a number instead of a name. If you've got what it takes to join Photocircuits, we promise you all the Recognition, Growth, and Satisfaction you're capable of attaining.

We need more men like Don Fischer. If you're a Ch. E., EE, Chemist, M.E., MS Engie or MBA/ Tech. with Bachelor, Master or Doctorate degree, see us.

ON CAMPUS

MARCH 7, 1967

Check with the Director of Placement, for further details on Photocircuits' current job opportunities and interview schedule.

**Did you like beer the first time you tasted it?**

A lot of people say no. They say beer is one of those good things you cultivate a taste for...like olives, or scotch, or kumquats.

Maybe. But we think it makes a difference which brand of beer we're talking about.

We think Budweiser is an exception to this "you've gotta get used to it" rule. It's so smooth. (You see, no other beer is Beechwood Aged: it's a costly way to brew beer, and it takes more time. But it works.)

So whether you're one of the few who has never tried beer, or a beer drinker who suddenly feels the urge to find out why so many people enjoy Budweiser, we think you'll like it.
