I-SCEP's activities during the past year were focused on the major goal of the Athletic Association to promote and administrate athletics on the MIT campus as an essential feature of the university's life. Arrangement of the faculty-student basketball, hockey, baseball, and track and field teams, as well as football games, are a few of the outside activities of the Athletic Association, but its major concern is the organization of intramural and varsity sports.

Sports grow through AA

The main goal of the Athletic Association is to promote and administrate athletics on the MIT campus as an essential feature of the university's life. Arrangement of the faculty-student basketball, hockey, baseball, and track and field teams, as well as football games, are a few of the outside activities of the Athletic Association, but its major concern is the organization of intramural and varsity sports.

Club sports

A free second innovation in the Athletic Association is the incorporation of women's athletics. At present there are no varsity sports for women, but sailing and fencing are being established for the future. Women's teams have become varsity sports after the upcoming seasons. In addition, many seasons it is expected that women's athletic activities will be established in the Association of Women Students on the Intramural Council. Water polo has been added as a regular intramural sport, and cycling and tennis continue on an experimental basis. In retrospect, the Athletic Association has done its share in raising MIT to true university status. Each year, new varsity sports are being added and new clubs are being formed, due in large part to the efforts of the Student Center of which has been invaluable in the school's athletic program. The new freshman quiz system is heavily favored over the old one according to a recent poll.
