Blood drive to start tomorrow

The annual TCA-APO Blood Drive begins this Wednesday and will continue until March 22. The goal this year is to surpass the 1,900 units donated by members of the MIT community last year. Anybody aged 18 to 59, student or non-student, may give blood, or non-student, may give blood, and may in turn receive blood for treatment while a member of the MIT community last year. Anybody aged 18 to 59, student or non-student, may give blood.

The drive is sponsored with the American Red Cross by TCA and Alpha Phi Omega, is timed to coincide with a shortage of fresh whole blood which occurs in New England each year at this time. It is hoped that everyone can keep his appointment; unscheduled walk-ins will be asked to return at some appointed time unless there is a vacancy. Any changes may be made by calling the numbers listed above.

Appointments for non-students may be made up to the start of the drive by phoning 37080 or, for students before the day of the drive, 37888. Anybody between 38 and 60 can give blood several times a year without endangering his health. Anyone who is passed by the Red Cross doctors and nurses doing screening during the drive may be assured that he will suffer no ill effects.

The drive will be held in the Student Center, as it was in past years.

Nominations for the Goodwin medal, awarded each year to a graduate student teacher, close Thursday. The medal, awarded at least once a year, is given to a graduate student teacher for "performance of teaching duties which are conspicuously effective over and above ordinary excellence." Nominations may be made by any member of the student body or faculty through SCEP. The nomination should include an in-formal statement explaining why the nominee qualifies for the award.

We've been at it 120 years—

But it still takes over four months to brew Carlsberg—the mellow, flavorful beer of Copenhagen.

We're looking for a company that will recognize you as an individual, provide you with a stimulating growth environment, and expect you to grow and progress to your fullest potential in the shortest period of time? especially when this potential includes top level management.

For EE's and ME's with Graduate and Undergraduate Degrees, we have positions available in Design and Development, Project Engineering, Applications Engineering, Test Equipment Design, Manufacturing and Production Supervision and Product Engineering.

For MBA's with Engineering Undergraduate Degrees, we have positions in Program Management and as Assistants to several of our officers.

We're a small company (1500 employees and $25 million in sales), but we plan on getting much larger.

If you are interested in discussing a future with us, a representative will be on campus March 16. See your placement officer for details.

If you are unavailable on the above date, please write to: W. L. Fryholm
