Social service in MIT's backyard

SSC dedicated to community action, not a revolution

by Michael Beddard

The Social Service Committee, which has 300 undergraduate members, was formed in 1968 by a group of students who were concerned with the needs of their campus. The committee has grown in size and membership, and is now one of the largest organizations on campus.

The SSC is a student-run organization, and its primary focus is on community service. It has a variety of programs and projects, some of which are described below.

a. tutoring programs

The SSC has several tutoring programs, including the Math Tutoring Program, the Science Tutoring Program, and the English Tutoring Program. These programs are designed to help students improve their grades and develop their skills in these subjects.

b. community service projects

The SSC has a number of community service projects, some of which are described below.

1. Habitat for Humanity

The Habitat for Humanity program is a long-term commitment by MIT students to build and sell homes for low-income families. The program is coordinated by the SSC and has a budget of $50,000 per year.

2. Community Service Corps

The Community Service Corps is a group of students who volunteer their time to work on various community service projects. The corps has a budget of $50,000 per year.

3. Mentoring programs

The SSC has several mentoring programs, including the Mentorship Program, the Academic Mentorship Program, and the Sports Mentorship Program. These programs are designed to help students develop their skills and build their confidence.

4. Environmental programs

The SSC has several environmental programs, including the Green Team, the Clean Team, and the Recycling Team. These programs are designed to promote environmental awareness and reduce waste.

The SSC is committed to providing high-quality service to the community, and it is continually working to improve its programs and projects. The SSC is a valuable resource for students who are interested in community service, and it is an important part of the MIT community.
