I WANT TO KNOW

Send me FREE reports of N.Y. Times articles and editorials telling about CIC, non-profit, tax-exempt foundation. Tell me how CIC brings together Americans and Russians of all ages and occupations to meet their counterparts in both the U.S. and the Soviet Union, and how I can participate in this program.

Why Can't You Control Your Memory?
A noted publisher in Chicago reports that people seek exploitations for acquiring a powerful memory which can pay good dividends in both business and social advancement. He claims to have given added speed and increased memory for those who interested.

To acquire the readers of this chapter with the sales for developing skills in memory, the publishers of this book have used a self-teaching method in a new book: "Memory Improvement in Mind Reading," which will be mailed free to those who request it. There is no obligation. Send your name, address, and city to:

Moss, Phyllis, 1010 A Woman's World, 11:45.

Nasa chooses 4 to investigate moon's surface
Two geophysicists, a geologist, and a chemist at MIT are among 120 scientists chosen by NASA to conduct experiments with the first samples of moon's surface that are returned to earth by US astronauts.

Dr. G. Vere Simpson, professor of geophysics, hopes to determine the echos of seismic waves. The second investigator is a four experiments in order to determine various thermal, elastic, and electrical properties of the surface material.

Dr. D. W. Strangway, assistant professor of geophysics, will attempt to measure magnetic properties of the moon's surface. He hopes to determine the possibility of a lunar magnetic field. He hopes to be able to study the behavior of the moon's magnetic field.
