New Education Center formed

MIT's famed Science Teaching Center will be closed for the summer. It is to be replaced by the new Education Center, which will be located in the same building but will house the institute's research and development activities. The center will provide a more flexible environment for the study of teaching and learning, with facilities for conducting experiments and developing educational materials.

Grad crew completes spring racing season

By Wendell Brown

A crusoe, making their third consecutive appearance, the MIT graduate crew graduated on April 17th, winning their game against Harvard, 6-2, in the annual Head of the Charles Regatta. The team, coached and steered by Westlake, 67, and Waldburg, 67, respectively, maintained a steady lead throughout the race, with only the Harvard crew capable of matching their pace.

One of the most active of the Greek-American contributions is the Institute of Greek-American Studies, founded by Professor Cyrus Levinthal, an MIT professor in the Institute of Political Science.

One of the most successful projects of the Education Center is the program currently being undertaken by Professor Cyrus Levinthal, an MIT professor in the Institute of Political Science.

The Center will soon be expanded in size to accommodate more students.

One application of computers in education is the use of computer programs to generate discussion among students.

The Greek-American contributions to MIT are being mobilized to aid the Constitution in its struggle against Greek nationalism. They have formed a local committee for the restoration of democracy in Greece and have assumed leadership of the movement to overthrow the junta.
