Constitutional reshaping

Cox probes Court reform

(Continued from Page 1)

Court, Cox considered three of its most controversial policies: the deem- ploring of civil rights through the Liberal interpretation of the Fourteenth Amendment and other laws, the preemption of political democracy through "one-man-one- vote" rulings, and the reform of criminal justice procedures. In each of these areas, Cox said the Warren Court has been reshaping the interpretation of Constitutional law; he called this in effect "judge-made" law as opposed to legislated law.

Problems raised

The significant decision or decisions in each area were reviewed. Cox also discussed some of the problems that have been raised or solved by these decisions, such as enforcement of civil rights legislations applying to private establishments.

ACU conference planned by SCC

The Student Center Committee is hosting the New England Regional Conference of the Association of College Unions-International on November 3, 4, 5 in the Student Center.

The Association of College Unions-International is the organizations of Student Union personnel, both students and professionals, throughout the United States, Canada, and parts of Europe.

Some 200 delegates from Student Union Boards of Governors representing some 60 colleges and universities throughout New England will be in attendance at the conference. The conference title is "Operation Springboard." The Student Center Committee has completely revamped and reconstituted the traditional regional conference. Because people from the Sloan School of Management will deal with topics in human relations and problem solving techniques, experts from the office of publications and Graphics Arts will discuss topics of advertising and publicity. Small group seminars will be led by MIT graduates who have been active in Student Government and Student Center affairs. The conference will also include a full schedule of special events for the delegates.

Conference Chairman Jack Reuer '68 also noted that the Student Center Committee will declare "Operation Springboard" a success if it can lead you almost anywhere you want to go.

The six hour examination for the Putnam Prize Competition will be given Saturday, Dec. 3. Further information about the examination, as well as a sign-up list, is available in Room 2-372. An organizational meeting for all undergraduates interested in the test will be held Monday at 5 pm in Room 2-109.

THE CODON CORPORATION
special computer system
Several full and part-time positions exist for:
real-time systems analysts
programmers
control systems engineers
