Peter Benequista, a Manager of Substrate Process Engineering at IBM, says:

"Want a company where bright guys can leapfrog ahead?

Then see IBM on campus November 15/16."

Sign up for an interview at your placement office--even if you're headed for graduate school or military service.

Join IBM and you'll launch a career in the world's fastest growing, fastest changing major industry--information handling and control. This growth is one of the many reasons young people can move ahead at IBM. (We have over 5,000 more managers today than we did less than four years ago.)

You'll work individually or as part of a small team (two to six people) no matter how large your project. That means you get quick recognition of achievement and also a strong sense of personal contribution.

You can stay technologically hot. You'll have an opportunity to do state-of-the-art work in many different technologies or computer applications.

IBM makes it easy to continue your education. One program, for example, pays tuition and fees for qualified applicants while you work on your Master's or Ph.D.

Where would you like to work? We have 19 plants, 21 laboratories, and over 260 offices throughout the U.S.

We'll be on campus to interview for careers in Marketing, Computer Applications, Programming, Research and Development, Manufacturing, Field Engineering, Finance and Administration. Come see us.

P. S. If you can't see us on campus, write to J. E. Bell, IBM Corporation, 425 Park Avenue, New York, New York 10022.
