President's report cites needs

(Continued from Page 1)

President Johnson also dismisses MIT's commitment to "rebuilding the humanities" as "a cute and meaningless confusion of the concept of a university and the concept of a liberal college." He states that "MIT's main job is to produce engineers, not liberal arts graduates." He goes on to say that "our university is not a college, but a school of engineering and science." He concludes his speech by saying that "MIT will continue to strengthen its commitment to the undergraduate side." We seek, he continues, "to create a unique and intellectual community of students, one in which they have responsibility as well as freedom..."

...it's working out just fine.

Dick Klophaus gets real satisfaction from the variety and sophistication of engineering needed to develop, design, and manage the research and development that produces Merck products. His experience is typical of Ch.E.s at Merck.

Deep and humble apologies are due to him.

Ch.E.s at Merck... "You know that isostructural recrystallization process Dick Klophaus worked out?"

Ch.E.s at Merck... "You know that isostructural recrystallization process Dick Klophaus worked out?"

Dick Klophaus, by the way, now supervises production of Vitamin C, Vitamin K, and various other products. His responsibilities, and those of other young Ch.E.s, are described in our new booklet, "Merck's engineers' company." If you're not yet familiar with the booklet, you'll actually enjoy reading it. Pick up a copy at Placement Offices, or write Manager, College Relations.
