I

By Carson Agnew

The Graduate Student Council and the Ashdown House Executive Council are at odds over the seating of a representative from that living group on the Council.

In a letter currently being circulated, the AHEC claimed that the Graduate Student Council refused to recognize the AHEC's authority. The GSC has not yet been registered, and may be again, according to Dean Vanderlip, chairman of the group. He himself cannot remember the ratification of the Constitution of the group by the students in time.

The AHEC letter comments that the present system of representation by appointment is necessary for the GSC "to make itself relevant to the needs of graduate students.

The residents of Ashdown House feel that the few GSC appointments are not representative of their group. The present system is ruled; Ashdown House Patrons will continue to praise, protest, and plot.

Deadline for Wellesley exchange drawing near

Students desiring to take courses at Wellesley in the 13-week term starting January 4 should apply immediately.

Applications must complete a questionnaire, which may be obtained in 1313, getting approval of the Faculty Council and recommend
to the president.

The completed questionnaires should be returned, in person, to Mrs. Giacomin in 232, interviews, which are being held through Friday, may be requested upon submission of the questionnaire.

Since the MIT-Wellesley exchange does not begin officially until September, 1968, only a few MIT upperclassmen can take Wellesley subjects in the upcoming term. No transportation can be provided by either school until September.

Students with cars which have not yet been registered in the state of Massachusetts should check immediately with the Campus Police. Out of town registration are now being
towed off the streets.

generous number of GSC representatives, it seems likely, however, that it will be possible to seat him at the next meeting of the Council, to be held Dec. 4.

The letter of the Ashdown House Executive Council goes on to criticize the GSC on several counts. It states that the GSC has never submitted a certification to the students for ratification. Furthermore, the GSC was not seated.

Finally, the GSC Constitution provides that the AHEC shall be given its rightful seat immediately. According to the GSC Constitution, the Ashdown House Executive Council does not have the authority of Ashdown.

Dr. Julius Stratton, former President of Wellesley, will serve on the newly-created Advisory Committee.

The Advisory Committee will suggest ways of preventing the attacks, and be a deceptively simple question: to date, has not been adequately studied, much less answer adequately.

In the afternoons, Dr. Bitter was a world authority on high-strength continuous magnetic fields. His invention of a new Magnet Laboratory as the Francis Bitter National Magnet Laboratory.
