Why engineering students graduate to Lockheed

Progress is a matter of degrees. But, that's only the beginning. At Lockheed Missiles and Space Company, we're working on... worldwide... otherworld... and subworld projects. We're pretty high on space... we've got aghera and other extremely advanced programs to prove it. And, when it comes to ballistic missiles, Polaris and Poseidon... we share in the triumph. Too, we're looking deep... we consider our deep submersible vehicles, for example. And, just to show you our feel are solidly on the ground, we're working on advanced land vehicles. Information, business, government and industry get it out of our systems.

LMSC has been in the sea... on land... in the air... in space... and now, we're coming to your campus. We'd like to talk to you about coming to LMSC. Contact your placement office for an appointment. Our Interview team will be on campus Feb. 16.

Move up to Lockheed... or move over for those who do. If an interview is inconvenient at this time, write to: Mr. R. C. Birdsell, Professional Placement Manager, F.O. Box 504, Sunnyvale, California 94088. LMSC is an equal opportunity employer.
