By Don Hertler

The increased involvement of clergy in the domestic and foreign policies of the United States government is beginning to fascinate many of MIT's religious counselors. Rabbi Herman Pollack's participation in local action groups such as the Arlington Street Church and the Committee for Informed Action (CIA) is part of a movement that has seen a group of about 75 young men in the draft during the last few years. Rabbis have been aligning themselves with clergy from the Boston area, accepted the draft as an issue of the American war, and have been protesting against United States participation in the Vietnam conflict.

Arlington Street Church's position on the war is, for example, that of a movement which has seen a group of about 75 young men in the draft during the last few years. Rabbis have been aligning themselves with clergy from the Boston area, accepted the draft as an issue of the American war, and have been protesting against United States participation in the Vietnam conflict.

Gray leaves two positions

Rota, Buttimer to coordinate FAC policy and counseling

MIT President Howard Johnson has recently announced the appointment of Professor Glass-Carlisle Rota as Chairman and of Mr. Peter Buttimer as Executive Officer of the Freshman Advisory Council. They will be taking over the positions from Professor Paul E. Gray, who will move on to his new post as Assistant Provost.

Responsibilities of FAC

The FAC is composed of about one hundred members of the faculty and administration. These individuals are responsible for the orientation and counseling of the freshman class and approximately 200 sophomores who have not designated a departmental course in their second year. The executive committee of the FAC, which Professor Rota will head, is responsible for developing policy guidelines for the counselors and for the freshman orientation weekend, and the freshman course selection program. Professor Rota will be responsible for providing liaison on matters of policy between the FAC and certain faculty committees and administrative offices.

Rota

Born in Vigevano (Milan) Italy, Rota was an active member of the Fascist Party and of the Patriotic League for Italy. He was also a member of the National Liberation Front, which he joined in 1943. In 1945, he was arrested by the American authorities and spent two years in a prison near Florence. Following his release, he returned to Italy and began teaching at the University of Bologna. In 1958, he was appointed Chairman of the Institute of Political Economy at the University of Virginia. He later joined the faculty of the Harvard School of Government, where he served as Chairman of the Department of Political Science from 1962 to 1967. In 1967, he was appointed Chairman of the MIT Political Science Department.

Buttimer

Buttimer was born in 1927 in New York City. He received his A.B. degree from Harvard University in 1949 and his Ph.D. degree in political science from Columbia University in 1954. He has served as a professor of political science at the University of Chicago and the University of California at Berkeley. He has also been a visiting professor at the University of Oxford and the University of Cambridge. He has written extensively on the subject of political theory, and his works have been published in leading journals and books.

Teaching, research to be draft exempt

By Greg Bernstein

A number of MIT's graduate students have received a 2A classification, which means they are not required to register for the draft. The new policy applies to students who are working on thesis projects outside of the United States and who have been classified as 1-A (the highest level of classification) by the Selective Service. The new classification is intended to allow graduate students to concentrate on their research and to contribute to national defense.

MIT High becomes a teaching lab

By Scott Martel

An entirely new type of undergraduate course may be offered to needy freshmen at the Institute this fall. The proposed course, a seminar on contemporary politics, would include actual classroom teaching experience at the Boston public high schools of Cambridge, Somerville and Charlestown. The course would be taught by 10-20 undergraduates.

Lazarus's Resignation

Lazarus, who had been teaching at the Institute for 15 years, was named as the head of the School of Engineering and Applied Sciences in 1972. He had previously served as the director of the Sloan School of Management and as the dean of the School of Engineering and Applied Sciences.

No Money Necessary

For building such a high school, a group of 200 interested students attended the first organizational meeting.

A steering committee, led by Mark Spitzer, Richard Adelson, and Dave Peterson, undertook the direction of the project, forming five work groups to consider various aspects of the program. To date, those work groups have apparently not met.
