The world is full of willing people: 
Some willing to work,
The rest willing to let them. 

(Robert Frost)

At Whirlpool, all our engineers are willing and able to make their own significant contributions. That's because they take their work seriously. . . . Whether it's assisting in the development of food, water and waste management systems for NASA or helping housewives get their dishes cleaner.

Whirlpool is where innovation is seldom uttered, but always seen . . . where motivation is part of our way of life . . . where preparation for the future is daily routine.

Sign up today and come in to see us . . . the working is fine.

Come see us on February 19, 1968
