John Kotter

There are basically four areas that should be dealt with by the permanent class officers. The first is a class gift and the idea we are using is a new concept which is both novel and functional. Back in 1965 the senior class held a "65 days to go" blast which was a huge success. Right now this is being organized also. Since we are the 30th graduating class, we should expect something special for graduation. Presently we are working on a plan which would call for three big name speakers at various times during the Thursday and Friday of graduation week. Finally, a number of ideas for post graduation communications are being looked into, including starting MIT clubs at a few selected grad schools.

Following the idea started last year, we too will appoint about a dozen man executive committees of interested seniors, who will be very useful in completing this semester's projects, and being more representative of the class as a whole will be valuable in aiding with post graduation communications.

Needless to say, I am very much looking forward to working with the above mentioned committees on the fine completion of these projects.

Mark Mathis

Our class government should work to serve the members of our class, and projects that are undertaken should bear this in mind. Two such projects are a post graduation information booklet and an 80 Days To Go Blast. The booklet should cover all areas open to the society, including information about the draft, the armed forces' programs, the peace corps, and VISTA. With proper management of a few pregraduation projects, the blast could be free for all members of our class.

The past has clearly illustrated that the job of the Senior Class President is defined by the individual who holds the position. My past record indicates that I have the potential to make the job a meaningful one.

Joe Bisaccio

This past year as President, I have seen the Class of 1969 come a long way from its shaky beginnings. We have done much to strengthen our reputation as a truly outstanding class. Through our unparalleled victory at Field Day, our many questionnaires, and our highly successful fund raising Phil Ochs Concert, we have manifested a high degree of organization.

It is presently this experience in organization which will enable a successful and memorable Junior Prom. As National President, I will use this experience to build upon the fine reputation which our class has achieved this past year.

Barry Breen

The primary function of the Junior Class President is to act as chairman of the Junior Prom Committee. In this position he has a dual responsibility: to repay the present class debt and to provide an entertaining and worthwhile Junior Prom. In order to accomplish these tasks successfully it takes a lot of experience and a tremendous desire to do it right.

Having worked for the past four months with the chairman of this year's Spring Weekend Committee, I feel I have gained invaluable experience in planning and running large weekends. I would now like to put this experience to work for the sophomore class and contribute my entire efforts and abilities to see that our junior class presents the best Junior Prom ever.

VOTE TUESDAY

will a job with LTV Aerospace make you more exciting, sought after, healthy, wealthy and wise?

Why shouldn't you enjoy the good things of life when you're out to conquer the universe? Sound far fetched? It's not. Your first job with LTV Aerospace sets you on a path that can lead you almost anywhere you want to go. LTV Aerospace Corporation makes products, of course.

At LTV Aerospace those capabilities are being examined in terms of the total environments of land, sea, air, space and outer space – in ocean sciences – high mobility ground vehicles – missile systems – military and commercial aircraft, V/STOL – launch vehicles – extra vehicular activity research and development. These are today's spheres of action at LTV Aerospace.

They are the frontiers of tomorrow. A representative of LTV Aerospace Corporation will visit your campus soon. Talk to him. Talk specifically about programs, assignments, duties, salaries, then, talk futures. Ask questions about where your first job can take you. He'll have answers for you, and they won't be vague generalities. He'll show you where LTV Aerospace Corporation is heading in the total environmental adventure, and how you fit in.

You could find yourself getting pretty excited about it. And that's a damned good way to feel about your first job.

College Relations Office, LTV Aerospace Corporation, P. O. Box 59074 Dallas, Texas 75228. An equal opportunity employer.
