Physics options offered

McCormick openhouse attracts many to tours

(Continued from page 1) most students in beginning physics immediately and will dismiss the need for 8,001, which has been discredited.

The option is part of an effort to offer a wider choice in meeting the Institute re-

quirements. Professor Albert Hill, Acting Chairman of the Department of Physics, ex-
plained that the need for in-

tensive work in physics no longer exists as it did when most students expected to be-

come engineers. Hill stated, "I feel very strongly that many students feel they are trapped here." Hill assured that the new option will in no way be an inferior course: "We are cer-
tain that any reasonable stu-
dent can go into the regular 8,001 after a semester of 8,011." He added that the transition from 8,012 to 8,002 would be more difficult but far from im-
possible; some additional but minor courses; subjects in the part of the student may be neces-
sary.
