**How to tap a keg**

(and tie into the best reason in the world to drink beer)

1. Pick up a half-barrel of Budweiser (good for about 245 12-ounce cups and with foam) and the tapping equipment on the day of the party. Just set the beer in a tub of ice to keep it cold.

2. Just before the party begins, tap your beer. First, make sure the beer faucet is closed (you wouldn’t want to waste a drop of Beechwood Aged Bud!). Then, insert the faucet-and-pump unit into the upper valve of the keg, give it a quarter turn clockwise, and lock it in place by tightening the lower wing nut.

3. Next, insert the lager tap in the lower valve of the keg and give it a quarter turn. Now, set the keg upright in a tub and pack ice around it.

4. You’re now ready to draw your beer. Pump pressure to the proper point for good draw, usually about 15 lbs. That’s all there is to it, but there’s no rule against sampling just to make sure everything is perfect. Awww! It’s no wonder you’ll find more taverns with the famous “Bud on Draught” sign than any other!
