The subject of the seminar was certainly one which was not intended to provoke silence. Even the announced topic, the formulation of US foreign policy, would have been a sufficient real topic, which was kept secret for rather obvious reasons, created an even larger gulf between the two sides.

At this point, we would like to condemn Mr. George Bundy, as it is our understanding that it was he who suggested discussion of the war. This takes courage, especially in controversy. How to today's political strategy, Nixon's no-show is a good show, for nothing which tends to mar the image of a weak man, a man-crafted campaign machine can be tolerated. But we have never noted Nixon as a political autocrat. In fact, Tricky Dick is by far the most politished, slickest politician on the national scene today, and yet, in his inability to face the American people with anything more than a two-faced smile and glib references to now. For as Tricky Dick now bows, even m

This seminar was in no way directed at all whom the people, or even more disconcerting, that demonstrating, without flowering obscenities ad a Mm their President, should feel he is unable to face the American people with anything more than a two-faced smile and glib references to now. For as Tricky Dick now bows, even m

this "bloodless revolution" or even know the true impact of what happened. In the 19th Century French revolution, the grass roots, the "repentant" people, were not involved, and made the higher education of all students. Central control from Paris to local universities in France have been abolished, and the Minister of Education has announced a new university, in which students will be elected on the councils. This new university, in which students will now become the equivalent of the presidents of French universities.

Letters to the Tech

To the Editor:

There is a tendency for people in organizations to form cliques, to make the organization their and lose sight of its origins as an instrument. Many MIT students view student government as such a clique. They see that only one type of person is elected, so only one point of view is represented. They feel that is not how they are to be seen.

For MIT to become effectively representative, the channels of communication at and between all levels must be open. Student self-government has been highly effective in the past, and is not to be found anywhere else. Student government is open, and the administration is in a position to change the administration's policies.
