I have been asked to express my opinion concerning the Sanctuary movement by the MIT Resistance Group and to present this view to the Student Center. I believe that the statement President Johnson made last year, when he accused me of being a subversive, is not accurate. It seems to me that the present situation may be just as bad. At that time, he said: "The presence of governmental and corporate recruiting activities on the campus has become a major issue by which student protesters choose to focus their attack on the present national policy in Viet Nam. I believe that the American people should not be faced with a fait accompli in this matter, and that the student protesters have the right to permit, provide, and protect an environment where dissent is to be encouraged, and the political rights of all students are to be protected." I believe that the American people should have the right to permit, provide, and protect an environment where dissent is encouraged and the political rights of all students are to be protected.

In my opinion, the most serious issue at hand is the question of governmental and corporate recruiting activities on the campus. I believe that the American people should have the right to permit, provide, and protect an environment where dissent is encouraged and the political rights of all students are to be protected.

The only place we can win our freedom is here. When there are no more police, there will be no freedom. We must fight to secure our freedom in the United States, because the police are the only ones who have the power to prevent such incidents. I understand that a certain number of people think that the way for me to fight for your freedom is in Viet Nam. I think we must fight here, because we have the right to express our views here.
