Naval Research Laboratory
WASHINGTON, D.C.
An Equal Opportunity Employer

The Navy's Corporate Laboratory—NRL is engaged in research embracing practically all branches of physical and engineering science and covering the entire range from basic investigation of fundamental problems to applied and developmental research. The Laboratory has a continuing need for physicists, chemists, metallurgists, mathematicians, oceanographers, and engineers (electronic, electrical, and mechanical). Apprentices, who must be U.S. citizens, receive the full benefits of the career Civil Service.

Candidates for bachelor's, master's, and doctor's degrees in any of the above fields are invited to schedule interviews with the NRL representative who will be in the MASS. INSTITUTE OF TECHNOLOGY placement office on MONDAY, DECEMBER 2

Those who for any reason are unable to schedule interviews may write the Personnel Office (Code 1813-1), Naval Research Laboratory, Washington, D. C. 20380.

Winter Weekend may return; '69 and '71 make proposal

The Class of '71 and the Class of '69 may sponsor a Winter Weekend, it was learned Sunday night at press time. Steve Ehrmann '71, President of the class, told The Tech that he believed that a majority of the freshmen in the class would support his plan, and thus allow them to request funds for Flintridge.

The proposed weekend would take place on February 28 to March 1, though its exact nature remained unclear. Depending upon budget problems and other limitations, the weekend could either be a full weekend or events on Saturday which could be supplemented by living group activities Friday night.

Financially, the sophomores would be the "enemies," according to Ehrmann. The sophomores have 12,000 to their treasury, whereas Flintridge, largely from dough sales, the seniors have 500. This would mean the use of some losses incurred by the weekend and thus be called by Ehrmann as a major factor influencing Flintridge's decision in favor of the weekend. At present, the seniors would take the first $200 of profits, with anything beyond that going to the sophomores.

Some opposition was noted by Ehrmann's plus Sunday night. The IFC and the Tangleton planned to hold Spring Weekend this year, but it is possible that a major Winter Weekend might take place.

Ehrmann told The Tech that IFC and Tangleton had originally requested to hold events on that day in order to make a profit which would be a buffer against losses that might be incurred during Spring Weekend.

No matter how this problem is resolved, the decisions are made in allocating weekend dates for the remainder of this year will be a major influence on the future of the weekend at the Institute.

Alicia de Larrocha triumphs

By Steven Shaladover

Occasionally, a great artist becomes so closely identified with a certain musical masterpiece that the performer's entire career is remembered simply by her performance of that work. Such is the case with Alicia de Larrocha when she performs Isaac Albeniz's "Iberia" on the Epic label. When the first recording of the album was released, it sold out immediately and, as of today, it is still out of print. The album is complete, with no device being used in its performance, and the pianist's interpretations of the pieces are free from any interpretation by others.

As important as technique is her total approach. Her technique is complete, with no device being used in her performance, and the pianist's interpretations of the pieces are free from any interpretation by others.
