Airlines may drop half-fare standby

Students under 21 in the near future may no longer be able to fly for half-fare on the major airlines that now offer the program.

Civil Aeronautics Board Examiner Arthur A. Preston has issued a decision calling for the elimination of the airline youth fare because he judges it discriminatory to adults, full-fare passengers. If the decision is upheld by the five-member board, youth fares will be dropped in 30 days.

The decision came under attack in the House of Representatives by Representative Arnold Oder (D. Mont.). He charged that the CAB ruling would "encourage thousands of young people to assume the illegal and dangerous practice of hitchhiking or to attempt long, exhausting automobile trips, frequently in unsafe vehicles."

Asserting that "I fail to see how permitting a young person to fly half fare on a seat that would otherwise go empty discriminates against young people," Oder further cited the benefits to the cause of education that half-fare schedules have brought about. He also indicated that the ruling would threaten half-fare tickets for youngsters between 2 and 12 years of age, for military personnel and other special fare plans.

Graphic originals to be rented from Stratton collection

The Stratton Collection of Graphic Art will now be available to students on a rental basis. Originally established to honor the work of Mrs. Kay Stratton, wife of the previous President of MIT, the collection consists of original prints of contemporary graphic art.

Although the small size of the collection had previously limited the exhibition of these prints to bring areas common to most students, the collection is now of sufficient size to allow the prints to be rented for use in private rooms, the expressed intention of this project is to enable students to enhance their rooms through the use of contemporary graphic art.

The prints are of the highest quality and are original, distinctive prints. Prints were chosen over traditional paintings because the prints are inexpensive, chosen over traditional paintings because the prints are inexpensive, original, distinctive prints. If you’ve ever resorted to NoDoz® at 4 a.m. the night before an exam, you’ve probably been disappointed.

NoDoz, after all, is no substitute for sleep. Neither is anything else we can think of.

What NoDoz does is a very strong stimulant. In fact, NoDoz has the strongest stimulant you can buy without a prescription.

Caffeine.

What’s so strong about that?

If we may cite The Pharmacological Basis of Therapeutics: Caffeine is a powerful central nervous stimulant. Caffeine excites all portions of the central nervous system. Caffeine stimulates all portions of the cortex, but its main action is on the psychic and sensory functions. It produces a more rapid and clearer flow of thought and allays drowsiness and fatigue. After taking caffeine, one is capable of more sustained intellectual effort and a more perfect association of ideas. There is also a keener appreciation of sensory stimuli.

Very interesting. But why take NoDoz when you can get caffeine in a cup of coffee?

Very simple. You take NoDoz all at once instead of sipping coffee for 10 minutes. And if you take two NoDoz tablets, the recommended dosage, you get twice the caffeine in a cup of coffee.

Two tablets--isn’t that likely to habit forming? Definitely not. NoDoz is completely non-habit forming.

Which means it’s safe to take whether you’re cramming at night, or about to walk into an 8 o’clock class, or driving somewhere (even though you’re rested) and the monotony of the road makes you drowsy.

One last thing you should know about NoDoz. It now comes in two forms. Those familiar white pills you take with water. And a chewable tablet called NoDoz Action Aids. It tastes like a chocolate mint, but it does everything regular NoDoz does.

And if you’ve managed to stay awake this long, you know that’s quite a lot.
