Open Letter to The Tech

This proposal is not evil in itself, but I do not see the need for it as the Placement Office can perform this service.

IV. That ROTC be abolished at MIT.

This proposal is also blatantly evil, for the draft and conscription are evil. It also proposes a direct violation of a student's right to participate in extracurricular activities.

V. "That all war related research at MIT be replaced by socially constructive research...".

The implication here is that war related research is neither socially constructive nor worthwhile. I can demonstrate that war related research is socially constructive if it is worthwhile, then it does not matter whether it is worthwhile or not. The term "socially constructive" is introduced as the standard of value, but not an instrument to judge proposals. Proposal V should be rejected for this reason.

I believe that, in general, the SACC position via written MIT is a result of fuzzy thinking. I think that SACC should prove their assertions and put the proof on paper. Some questions they ought to ask of themselves are: What is reality? What is right? Should n't right be observed and why? What kinds of rights do people have? What kinds of people have rights? Are there any circumstances under which force can be used? When SACC present these questions—they do an excellent job—then SACC will then be capable of dealing with the complex moral issues of the day.

Siriously yours,
John B. Linn III '69

Volunteer Army?

To the Editors:

Celebrating with their students, John Kenneth Galbraith and Milton Friedman jump for joy! It seems that everyone except General Hershey is happy about President Nixon's plan to use a volunteer Army. But I am not, and I listen to the arguments for efficiency, realize what a man power shortage we have accomplished in Vietnam, and am very much afraid of the mob element... then National Semiconductor.

If you have experience in language info-storage and retrieval, simulation, and time-sharing systems, data communications, development, monitors and control systems, if you have the money or the I.Q. test score to get into college.

To arrange for a campus interview please contact your Placement Office. If interview is inconclusive a letter will be sent asking for further information. This proposal is the beginning of personal interviews. The volunteer Army... then National Semiconductor...

New Orientation Week plan to greet next freshman class

The one thing that is clear about next year's Freshman Orientation Week is that it will be different from anything in the past, with the IFC, Dormcon, Freshman Advisory Council and Dean's Office involved in one integrated program.

Last November, representatives of all these groups met and discussed several ways for improvement of the academic, extra-curricular, and residence orientation programs. Among them, the need to reduce pressure of all kinds on freshmen was the most important. This will permit them to make decisions based on more nearly complete information in regard to residence and academic program. It would additionally allow more time for formal orientation to acquaint the community, and opportunities for more informal contact with the faculty.

Other problems were identified in diverse areas. More time is needed for such administrative activities as the analysis of diagnostic test scores, program registration and subjects scheduling, and assigning rooms is done hastily according to indicated preferences. For those who select dormitories with non-academic orientation to the freshmen was the most important. The need to reduce pressure of all kinds on freshmen was the most important. The need to reduce pressure of all kinds on freshmen was the most important. The need to reduce pressure of all kinds on freshmen was the most important. The need to reduce pressure of all kinds on freshmen was the most important. The need to reduce pressure of all kinds on freshmen was the most important. The need to reduce pressure of all kinds on freshmen was the most important. The need to reduce pressure of all kinds on freshmen was the most important.

The plan is to hold two Orientation Weeks the first would start Orientation Thursday, Sept. 11, with academic, extra-curricular, and residence orientation extending for eight days with a lack of draftees; that the "needless" salaries (and taxes?) would make up for present levels of income. We are seeking a volunteer Army, and have the money or the I.Q. test score to get into college.

Mr. Hurwitz

Lamps

To the Editors:

Would it be possible to obtain a few standing lamps for the corridor immediately outside the Ronch Library? There are several lounge chairs there, usually occupied by students, and there is no lighting except a small lamp and remote fluorescent in the ceiling. This could be developed into a very popular lounge area by the addition of a few good reading lamps.
