Letters to The Tech

(Continued from page 4)

I scribethe MIT faculty's record of success to the problem of a student who depends on background.

According to the Tech's editorial board, the problem of a student who depends on background is significant to learn precisely what the terms of ROTC's contract provisions are, and how the long-range public interest, would be served.

The nine points are, at best, side issues that the MIT community should exhibit the sense of justice and moral sensitivity that the basic issue is the moral and political problem. The writers are concerned with how the people outside MIT will react upon MIT's treatment of its ROTC issue. By now, the national representatives of foundations and industry, and members of other organizations concerned with ROTC, wish to continue will also be capable of accommodating those who wish to teach in Baltimore. No experience ever thought of teaching?

An Institute-wide Spring Urban Conference has been scheduled for Friday and Saturday, May 12. The conference will begin with a general overview statement by Professor Joe Martin '71 of the Department of Civil Engineering, followed by panels dealing with specific features of ROTC incompatible with the concept of the freedom of MIT, to meaningfully relate to ROTC. Can one begin to speak directly with the issue of profits for release are, and how the long-range public interest, would be served.

Announcements

* The Nominations Committee will hold a meeting Tuesday night at 7:30 in Room W20-400.

* The Nominations Committee of the new Student Government is currently engaged in filling appointments to administration and faculty committees. There are currently positions open on the following committees: Academic Performance, Student Environment, Athletic Board, Community Service Committee, Community Service Fund, Evaluation of Freshman Preparation, Placement and Admissions, Activities Development Board, Task Force on Equal Employment Opportunities, and Student Information. Anyone who would be interested in serving on any of these groups for the next year should contact Welks Edelman, X361, as soon as possible.

* A reference collection on MIT and its activities has been created in the Student Center Library. The present President and Treasurer's Reports, Policies and Procedures, compilations of research projects and publications, and information on the Corporation are among the publications pertinent to the debate on the future of MIT. The library acted promptly after such a collection was recommended by the Committee to study MIT's External Commitments. Some documents in the collection were not easily accessible to students before, including the Report of the Visiting Committee on Sponsored Research and the Rules and Regulations of the Faculty. The information on research activities at MIT should also be useful to students seeking thesis topics and advisers. The collection is located to the left as you enter the Library.

* Summer Employment: Work in education, recreation, and rehabilitation is available for men, preferably Spanish-speaking, in the South End management of food wages, income based program dealing with military and urban prob-

* The Pot Luck Coffeehouse will be open tonight at 8:00. Featured will be the Bluegrass String Band and a Country Dance Workshop in the West Lounge (come the change from the Mezzanine Lounge). All are welcome.

* Summer Session Registration Material must be returned to the Registrar's Office, Room 7-111, by 3:00 p.m., Wednesday, May 21.

* Nominations are still open for the Everett Moore Baker Award for outstanding undergraduate teaching. Any student may nominate a junior or senior faculty member who he feels has demonstrated, by taking of work justice to its ROTC DDS and other student groups present.

The Urban Calendar

An Institute-wide Spring Urban Conference has been scheduled for Friday and Saturday, May 9 and 10. The conference will begin with a general overview statement by Professor Charles Miller of the Department of Civil Engineering, followed by panels dealing with specific urban activities now underway at MIT. The conference will attempt to chart what MIT has done through its commitment to urban affairs, where it now stands, and what actions remain to be taken. Invitations to the conference are being extended to local, state, and Federal officials, representatives of foundations and industry, and members of other organizations concerned with urban affairs. Details of the conference will be released next week.

The Urban Systems Laboratory Computer Group seminars will include the following:

Ron Nilsson will speak on "CMS/ICES: Tis Use and Subsystem Development" on Monday, May 5.

Ronald Walter will speak on "Assisting Health Planning with CMS/67" on Monday, May 12.

All lectures will be held in the fifth floor conference room in Building 9 from 3-5 pm.
