### Land shortage cuts expansion

Utilize land on the Wellesley portion of this land, though there are no plans to hind 100 Memorial Drive between Ames Street and Kendall Square. The area is to be considered for future expansion, though it is not clear exactly what purposes it will serve.

In the interest of expediency, he is considering the possibility to make room for MIT's projected growth. After preliminary remarks, Tel- ler testified that "we don't know whether defense or additional offensive force will be cheaper and more effective" and hence the US should invest more in research and development, and a limited deployment in order to gain insight into cost-exchange ratios between offense and defense. This would help us design better penetration aids for our own missiles. Also this limited "research and development" deployment would enable us to negate from a position of strength and knowledge in the upcoming SALT (Strategic Arms Limitation Talks) negotiations.

Teller argues that by not deploying the Safeguard system, the US would be buying "assured ignorance." Assured ignorance, according to Teller, is what we are going to have if we don't develop since we won't know how to penetrate the Soviet ABM or how to negotiate with the Russians.

He stated that such an imbalance in knowledge would be dan- gerous as an imbalance in po- wer.

Teller testified that he felt the current ABM debate was being hindered by excessive secrecy on the part of the American government and the resulting information gap. He therefore asked that "rules of secrecy should be rediscussed and made more bac- terial at all points in his testimony."

Teller stated that any attempt to quantify the trade-offs between offense and defense would be a mistake. Later, when Ful- bright, in his inimitable per- sonal style, pressed the insur- Teller responded quite positively for the trade-off, stating it was 3:1 in favor of the offense. In 1959, Teller said the ratio was 30:1 also in favor of offense. Vote estimate. The current count being circu- lated on the Hill by proponents of the ABM is 53:47 in favor of the deployment when the matter comes to a vote. Informed sources opposed to the deployment say that the vote stands at 50 up- against, four leasing against, for, and 41 definitely opposed to the system. It remains to be seen, when the vote is taken in the middle of next week, upon today's hear- ing will have on the final decision in the Senate.

### Student House to go coed: girls to move in this fall

By Harvey Baker

"It's just so exciting. I'm really looking forward to it. We've worked so hard and now we may really get it."

With these words, an MIT coed summed "it up. What is it? Coed living, in MIT's Stu- dent House.

Student House President David L. McWhinney '70 has announced that pending the approval of the Student House's Alumni Board, work on the project will begin. It is hoped that the girls, all MIT coeds and expected to take on residence this September. The criteria for admission to Student House will be the same for the girls as for Technmen living there. Applicants will need to show demonstrable evidence of financial need and a record worthiness of this opportunity.

Several coeds have already de- clared their intention to look for the possibilities of Student House living. One, Jan Dubinsky '72, has already indicated that given the opportunity, she will move.

Extensive renovation of Student House is included in the plan for coed living. It is hoped that the House will be able to guar- antee any prospective girl the privi- vacy and study conditions the desires as well as the opportunity for living in a small, tightly-knit group of students.

Because Student House is not officially listed as a housing house, as MIT's fraternities are not bound by the regulations prohibiting coeducational living, it is a matter of organization and has prepared an extensive legal base for its action, which will be researched, and discussions with institutions law-

It is reported that consulta- tions have also been held with Dean Kenneth B. Wadleigh and Richard Sorensen and Institute Psychiatrist Bernard Snyder, who have indicated at least temporary approval and have agreed to in sailing to Class of 73 freshman girls.

### Vietnam and World Freedom... Is there a connection?

In Prague
The Soviet Army marches in to students defy Soviet tanks, but censorship and thought control is taken in the middle of next month, what effect today's hear- ing will have on the final decision in the Senate.

In Moscow
Stalin's daughter and thousands of anti-Vietnam protesters are sent to Siberian labor camps or committed to asy- lums by a regime that seeks to stifle all voices of dissent.

From China
The Red Chinese army con- vert Troops, their motives and goals.

On the American Campus
Extremists man-handle profes- sors, burn libraries, seize and vandalize buildings, and spread a climate of intolerance and violence.

In Vietnam
Thousands of teachers and civic leaders are murdered by the Viet Cong while a strug- gle continues to scuttle and run so the Communists can take control. Five leaders of the nation are killed, thousands are sent to Siberian labor camps or committed to asy- lums by a regime that seeks to stifle all voices of dissent.

Because Student House is not officially listed as a housing house, as MIT's fraternities are not bound by the regulations prohibiting coeducational living, it is a matter of organization and has prepared an extensive legal base for its action, which will be researched, and discussions with institutions law-

It is reported that consulta- tions have also been held with Dean Kenneth B. Wadleigh and Richard Sorensen and Institute Psychiatrist Bernard Snyder, who have indicated at least temporary approval and have agreed to in sailing to Class of 73 freshman girls.

### VAN HEUSEN

"417"

**VANOPRESS SHIRTS**

The moves, the stimulators, college men turning their "row" thoughts into action, demand the best in club shirt fashion. Van Heusen "417" Vanopress. Featuring the new longer point Brooke collar, made to be worn with or without pin, V-Taper fit, 7- button front, longer sleeve length. And Vanopress, the last word in perma- nent press. All in different styles, colors, exciting new stripes and checks. Van Heusen "417" Vanopress...where "new" really means "now!"
