And Crimson bluses...

By Robert Ekin

Two relatively new weekly newspapers, the Independent and the University Gazette, are making their debut at Harvard this fall.

Published to provide another student voice on campus, the Independent will spotlight an overview of the news and entertain-entertainment features. News analysis will be emphasized, replacing the standard superficial coverage of current events normally associated with a daily newspaper. The Independent will have a definite editorial policy, but the editors will encourage other opinions and will attempt to present both sides of an issue on the editorial page. Student contributions will provide the majority of articles.

According to Jim Sullivan, the Harvard administration, editor of the Independent, will provide the majority of articles.

BLOW YOURSELF UP

Cambridge

Do you think a bright young engineer should spend his most imaginative years on the same assignment?

Neither do we.

That's why we have a two-year Rotation Program for graduating engineers who would prefer to explore several technical areas. And that's why many of our areas are organized by function rather than by project.

At Hughes, you might work on spacecraft, communication satellites and/or tactical missiles during your first two years. All you need is an EE, ME or Physics degree and talent.

If you qualify, we'll arrange for you to work on several different assignments... and you can help pick them.

You may select specialized jobs, or broad systems-type jobs. Or you can choose not to change assignments if you'd rather develop in-depth skills in one area.

Either way, we think you'll like the Hughes approach.

It means you'll become more versatile in a shorter time.

And your salary will show it.

CAMPUS INTERVIEWS:
October 20 & 21, 1969

Representatives of several activities of Hughes Aircraft Company (each with highly-specialized personnel requirements and separate interview schedules) will visit your campus. If your career interests lie in one or more of the following fields of aerospace/electronics, contact your Placement Office TODAY to make sure your name gets on the interviewing schedule for HUGHES AEROSPACE DIVISIONS:

Microwave & Antenna Engineering
Guidance & Controls Engineering
Spacecraft Design Engineering
Components & Materials Engineering
Weapon Systems Engineering

Electro-Optical Engineering
Microcircuit Engineering
Space Systems Engineering
Missile Systems Engineering
Circuit Design Engineering
