It seemed so hard.
To really get involved.
To have a voice in man's destiny.
It was so simple.

If you really want to keep the faith, get involved. Become part of man's greatest adventures and greatest dreams. It can be so simple. It can mean a promising future for those who would, among other things, replace their Solar System. We’re a group of creative individuals who've photographed and sold their own moon, flown by and photo-

Rugby club wins three; 'A' squad still undefeated

MIT's rugby squads put it all together this weekend for the first time as all three teams scored victories. The first team remains undefeated and continues to push for national ranking and Eastern top ten honors. In Saturday's first action, the newly organized third team gained a well deserved victory over the University of Massachusetts. The second try came after Bill Thilley came out of a loose ruck with the ball near the UMass goal line and passed to Bruce Fennan who scored easily. Peter Thilley then converted and the half ended 9-0.

Mark Furtney started off the scoring in the second half with a beautiful twisting run down the sideline which ended when he ran over the last tackler on the goal line. About this time UMass started running out of endurance and desire. Pedro Taborga, Ed Randen, Ape, and Peter Webster each scored a try and Ape kicked a conversion to run the score up to 25-0.

Finally, an Sunday the second team gained a 17-6 victory over the Newport RFC. Although physically outmatched, Tech prevailed through superior knowledge of the game and the ability to capitalize on mistakes. Newport took an 8-3 first half lead on the strength of two long breakaway runs by their fullbacks. However, Tech came roaring back in the second half by superior coverage of kicks and runs to win. Lloyd Wood scored two tries for MIT, while Derek Moss, and Bob Gelfand each had two. The rest of the scoring was a penalty kick and a conversion by Jerry Thom.

This Saturday, Tech will meet Fairfield College on Bridge Field.

If you're qualified and would like to work with a variety of talented programmers, mathematicians, physicists, chemists) who want to go beyond Mars, there are opportunities at JPL.
