Women's sailing team wins four of first six regattas

By Kathy Jones

The women's sailing team has scored a number of impressive victories in events in which they have participated this fall. The varsity team competed again this weekend for MIT's Lab Trophy.

But from the first day of practice, the team was determined to make a strong showing. Although the team has had to manage without help from the MIT sailing club, they have managed to score victories in each of their first six regattas.

The high-scoring win on Saturday was against the Brown Bears, who had won the previous Regatta. The Tech women's team finished in second place with a score of 50, clinching their second straight win of the season.

Boaters break loss skien by defeating Brandeis 2-1

By Jdhn Light

Strong winds and a poorly conditioned course usually mean a high scoring golf match, and today was no exception as the Wachusett C.C. in West Boylston, Mass., was set up with a high wind. The Tech golfers proved they could handle conditions, however, as they pulled out victories over Brandeis and Clark. This raised their season record to 5-1.

Clark failed to show for the past two years, and the Tech found out why as the Engineers were a laugher, 6-0. Brandeis, the usual team, still went down to defeat for the second time this season.

Maintaining his undefeated record at the number one position was Ken Snodgrass, whose Rich, Eskin '72, who scored the opening goal in the Brandeis game, controls ball in a losing effort against Amherst. The Tech kickers managed only third behind Radcliffe and Newton. One week later, a crew traveled to URI, an event many Tech fans had been looking forward to.

During the next three weeks, the Tech's regular dinghy season opened on the Charles. With five straight defeats, the varsity soccer team finally got to register their second win of the season with a 2-1 victory at Brandeis.

The two squads played to a scoreless first half before sophomore halfback Rick Eskin kicked the ball into the goal. Eskin dribbled through the Tech's defense and found a hard screen shot fly from about 30 yards out. The ball beat the goalie to the far corner, and it was 1-MIT.

The score stayed that way until eleven minutes were left in the game. Then Steve Young '70 split the Brandeis defenders with a beautiful pass to Jimmy Korf '70. Korf just had to beat the goalie in the goal area in the breakaway situation, and when the Brandeis netminder came out to meet him, the Tech forward passed it on his way to the goal to become the winning score.

The final score was 2-1, over, however. With about three minutes left, the Tech broke up the Brandeis defense and scored their second goal of the afternoon.
