MIT ugles vie for UMC

During this week once again the Alpha Chi Chapter of Alpha Phi Omega is attempting to find the subject man on the MIT campus. AFO wants all members of the MIT community to participate in this effort by voting at the UMC booth in Building Ten. One cent each one vote and they ask every one to vote as often as possible in the grand total. The stipulation of open-ended selection was made. The results represent about 10% of the undergraduate body. Much of the war research has been lumped together, at war research, and at weapons system development. The Weather, Fair and cold. (80°m)
