WILL YOU LIKE TO START YOUR OWN CHURCH?

We will furnish you with a Church Charter and you can start your own church.

The Universal Life Church with over 26,000 ministers already ordained.

WILL YOU LIKE TO BECOME A MINISTER?

ORDINATION is without question and for life. LEGAL in all 50 states and most foreign countries. Perform legal marriages, ordinations, and funerals. Receive discounts on some fares. Over 26,000 ministers have already been ordained. Minister's credentials and church assets: an ordination certificate for framing and an ID card for your billfold. We need your help to cover mailing, handling, and administration costs. Your generous contribution is appreciated.

Write to: Universal Life Church
Box 8071
Fort Lauderdale, Florida 33314

Engineers, Mathematicians:

At NSA, our successes depend on yours.

Because of the nature and scope of the National Security Agency’s mission, our successes are in direct relation to your achievements. At NSA, we are responsible for designing and developing secure/inviolable communications and EDP systems to transmit, receive, and analyze much of our nation’s most vital information. The advanced technologies applied in this work are such that they will frequently take you beyond the known and accepted boundaries of knowledge. Consequently, your imagination and resourcefulness are essential qualifications for success.

The Career Scene at NSA: Engineers will find work which is performed nowhere else. Devices and systems are constantly being developed which are in advance of any outside the Agency. As an Agency engineer, you will carry out research, design, development, testing and evaluation of sophisticated, large-scale communications and EDP systems. You may also participate in related studies of electromagnetic propagation, upper atmosphere phenomena, and solid state devices using the latest equipment for advanced research within the Agency’s fully instrumented laboratories.

Mathematicians solve real-life and complex communications-related problems. Statistical mathematics, matrix algebra, and combinatorial analysis are but a few of the tools acquired by Agency mathematicians. Opportunities for contributions in computer sciences and theoretical research are also offered.

Computer Scientists participate in systems engineering and program design related to advanced scientific and business applications. Software design and development is included, as well as support in hardware design, development and modification.

Career Benefits: NSA’s liberal graduate study program permits you to pursue two semesters of full-time graduate study at full salary. Nearly all academic costs are borne by NSA, whose proximity to seven universities is an additional asset.

Starting salaries, depending on education and experience, range from $5,169.00 to $15,000.00, and increases will follow systematically as you assume additional responsibility. Further, you will enjoy the varied career benefits and other advantages of Federal employment without the necessity of Civil Service certification.

Check with your Placement Office for further information about NSA, or write to: Chief, College Relations Branch, National Security Agency, Ft. George G. Meade, Md. 20755. An equal opportunity employer, M/F.
