MIT may lose over $100,000 in aid funds if it refuses to supply the Commonwealth of Pennsylvania with names, addresses and "pertinent facts of all Pennsylvanians students involved in disruptive demonstrations or similar activities).

Last month, a letter dated March 2 was received by colleges throughout the country. It was from the Pennsylvania Higher Education Assistance Agency, which dispenses over 50 million dollars in scholarships and loans to Pennsylvania students nationwide.

The ban kicked in yesterday to consider the lessons of the past. Repression, and a careless disregard for the plight of the students, moveing toward apartheid in South Africa today has arrested a boundary set with an eye to circumvent the international community.

US Senator Eugene McCarthy and Georgia legislator Julian Bond will visit downtown Boston next week for the focal activities of the April 15 antitwar demonstrations reopening last fall's message of "End the War Now."

However, in contrast to the autumn protest, several different leftist groups are forming plans for separate actions. The Student Mobilization Committee will be participating in the Wednesday rally, while the November Action Coalition may join other area militant groups in a demonstration in the streets of Cambridge.

The quota system for women has been a bone of contention for the long history of female undergraduates at MIT. The first woman was enrolled in 1865; since then, they have numbered between two and seven percent of the total enrollment. By and large, though, their numbers have been crippled with problems. Only 36% of the women in the class of 1960, for example, were admitted to the Admissions office to accept the offer.

Portugal's role in Africa also came up for special attention. The European country controls three colonies with combined African population of 10 million. One commentator has charged that "The Portuguese presence in South Africa today is still characterized by ignorance, repression, and a careless exploitation of the African people, and in purely human terms the lessons of the past offer little hope for the future."
