If you think you're getting a great shave with a razor blade, feel your face.

A razor blade can give you a good, close shave on the easy

Like your cheeks. Because your cheeks are almost that, a razor blade.

But what about the hard-to-shave parts of your face?

Your neck

Feel your chin

The Norelco Tripleshader has 3 Microgroove shaving heads that follow the curves of your chin.

The heads go in where your chin goes in, and out where your chin goes out.

To give you a really close shave, without injuring your skin.

Independent tests, the Tripleshader showed as close or

including independent tests, the Tripleshader showed as close or

with floating heads to follow the curves of your face.

Feel your sideburns

The biggest problem with shaving sideburns is to get them straight, and even on both sides.

The Norelco Tripleshader has a pop-up trimmer that lets you see exactly what you're trimming.

So it's a lot harder to make a mistake.

Now, run your hand over your whole face.

If your beard feels uneven, maybe you should be shaving with a Norelco Tripleshader.

Feel your upper lip

The hard thing about shaving your upper lip with a razor

Blade is shaving close enough.

Again, the unique Norelco design lets you maneuver around your nose and mouth, to shave your beard in every direction.

A NY Times reviewer compared it to soma.

The New York Times

'You can't get any closer.'

If you think you're getting a great shave with a razor blade, feel your face.
